FEDERALLY ENFORCEABLE STATE OPERATING PERMIT (FESOP) Renewal OFFICE OF AIR QUALITY

**Rieth-Riley Construction Company, Inc.
361 West U.S. Highway 6
Valparaiso, Indiana 46383**

(herein known as the Permittee) is hereby authorized to operate subject to the conditions contained herein, the source described in Section A (Source Summary) of this permit.

This permit is issued in accordance with 326 IAC 2 and 40 CFR Part 70 Appendix A and contains the conditions and provisions specified in 326 IAC 2-8 as required by 42 U.S.C. 7401, et. seq. (Clean Air Act as amended by the 1990 Clean Air Act Amendments), 40 CFR Part 70.6, IC 13-15 and IC 13-17.

Operation Permit No.: F127-14158-03224	
Issued by: Original signed by Paul Dubenetzky Paul Dubenetzky, Branch Chief Office of Air Quality	Issuance Date: April 18, 2002 Expiration Date: April 18, 2007

SECTION A SOURCE SUMMARY

- A.1 General Information [326 IAC 2-8-3(b)]
- A.2 Emission Units and Pollution Control Equipment Summary [326 IAC 2-8-3(c)(3)]
- A.3 Insignificant Activities [326 IAC 2-7-1(21)] [326 IAC 2-8-3(c)(3)(I)]
- A.4 FESOP Applicability [326 IAC 2-8-2]
- A.5 Prior Permits Superseded [326 IAC 2-1.1-9.5]

SECTION B GENERAL CONDITIONS

- B.1 Permit No Defense [IC 13]
- B.2 Definitions [326 IAC 2-8-1]
- B.3 Permit Term [326 IAC 2-8-4(2)]
- B.4 Enforceability [326 IAC 2-8-6]
- B.5 Termination of Right to Operate [326 IAC 2-8-9][326 IAC 2-8-3 (h)]
- B.6 Severability [326 IAC 2-8-4(4)]
- B.7 Property Rights or Exclusive Privilege [326 IAC 2-8-4(5)(D)]
- B.8 Duty to Supplement and Provide Information [326 IAC 2-8-3(f)] [326 IAC 2-8-4(5)(E)]
- B.9 Compliance Order Issuance [326 IAC 2-8-5(b)]
- B.10 Compliance with Permit Conditions [326 IAC 2-8-4(5)(A)] [326 IAC 2-8-4(5)(B)]
- B.11 Certification [326 IAC 2-8-3(d)] [326 IAC 2-8-4(3)(C)(i)] [326 IAC 2-8-5(1)]
- B.12 Annual Compliance Certification [326 IAC 2-8-5(a)(1)]
- B.13 Preventive Maintenance Plan [326 IAC 1-6-3][326 IAC 2-8-4(9)][326 IAC 2-8-5(a)(1)]
- B.14 Emergency Provisions [326 IAC 2-8-12]
- B.15 Deviations from Permit Requirements and Conditions [326 IAC 2-8-4(3)(C)(ii)]
- B.16 Permit Modification, Reopening, Revocation and Reissuance, or Termination
- B.17 Permit Renewal [326 IAC 2-8-3(h)]
- B.18 Permit Amendment or Revision [326 IAC 2-8-10][326 IAC 2-8-11.1]
- B.19 Operational Flexibility [326 IAC 2-8-15]
- B.20 Permit Revision Requirement [326 IAC 2-8-11.1]
- B.21 Inspection and Entry [326 IAC 2-8-5(a)(2)] [I13-14-2-2]
- B.22 Transfer of Ownership or Operation [326 IAC 2-8-10]
- B.23 Annual Fee Payment [326 IAC 2-8-4(6)] [326 IAC 2-8-16]

SECTION C SOURCE OPERATION CONDITIONS

Emission Limitations and Standards [326 IAC 2-8-4(1)]

- C.1 Overall Source Limit [326 IAC 2-8]
- C.2 Particulate Matter Emission Limitations For Processes with Process Weight Rates
- C.3 Opacity [326 IAC 5-1]
- C.4 Open Burning [326 IAC 4-1][IC 13-17-9]
- C.5 Incineration [326 IAC 4-2] [326 IAC 9-1-2(3)]
- C.6 Fugitive Dust Emissions [326 IAC 6-4]
- C.7 Operation of Equipment [326 IAC 2-8-5(a)(4)]
- C.8 Stack Height [326 IAC 1-7]
- C.9 Asbestos Abatement Projects [326 IAC 14-10] [326 IAC 18] [40 CFR 61.140]

Testing Requirements [326 IAC 2-8-4(3)]

- C.10 Performance Testing [326 IAC 3-6]

Compliance Requirements [326 IAC 2-1.1-11]

- C.11 Compliance Requirements [326 IAC 2-1.1-11]

Compliance Monitoring Requirements [326 IAC 2-8-4] [326 IAC 2-8-5(a)(1)]

- C.12 Compliance Monitoring [326 IAC 2-8-4(3)] [326 IAC 2-8-5(a)(1)]
- C.13 Maintenance of Emission Monitoring Equipment [326 IAC 2-8-4(3)(A)(iii)]
- C.14 Monitoring Methods [326 IAC 3][40 CFR 60][40 CFR 63]
- C.15 Pressure Gauge Specifications

Corrective Actions and Response Steps [326 IAC 2-8-4] [326 IAC 2-8-5]

- C.16 Emergency Reduction Plans [326 IAC 1-5-2] [326 IAC 1-5-3]
- C.17 Risk Management Plan [326 IAC 2-8-4] [40 CFR 68.215]
- C.18 Compliance Response Plan - Preparation, Implementation, Records, and Reports [326 IAC 2-8-4] [326 IAC 2-8-5]
- C.19 Actions Related to Noncompliance Demonstrated by a Stack Test

Record Keeping and Reporting Requirements [326 IAC 2-8-4(3)]

- C.20 Emission Statement [326 IAC 2-6] [326 IAC 2-8-4(3)]
- C.21 General Record Keeping Requirements [326 IAC 2-8-4(3)] [326 IAC 2-8-5]
- C.22 General Reporting Requirements [326 IAC 2-8-4(3)(C)] [326 IAC 2-1.1-11]

Stratospheric Ozone Protection

- C.23 Compliance with 40 CFR 82 and 326 IAC 22-1

SECTION D.1 FACILITY OPERATION CONDITIONS

Emission Limitations and Standards [326 IAC 2-8-4(1)]

- D.1.1 General Provisions Relating to NSPS [326 IAC 12-1] [40 CFR Part 60, Subpart A]
- D.1.2 Particulate Matter (PM) [326 IAC 12] [40 CFR 60.90, Subpart I]
- D.1.3 Opacity [326 IAC 12] [40 CFR 60.90, Subpart I]
- D.1.4 Particulate Matter less than micron (PM-10) [326 IAC 2-8-4]
- D.1.5 Sulfur Dioxide (SO₂) [326 IAC 7-1.1-1]
- D.1.6 No. 2 Fuel Usage and Equivalents [326 IAC 2-8-4]
- D.1.7 Natural Gas Fuel Usage and Equivalents [326 IAC 2-8-4]
- D.1.8 Preventive Maintenance Plan [326 IAC 2-8-4(9)]

Compliance Determination Requirements

- D.1.9 Testing Requirements [326 IAC 2-8-5(a)(1), (4)] [326 IAC 2-1.1-11]
- D.1.10 Particulate Matter and PM-10
- D.1.11 Sulfur Dioxide and Sulfur Content
- D.1.12 Used Oil Requirements

Compliance Monitoring Requirements [326 IAC 2-8-5(a)(1)]

- D.1.13 Visible Emissions Notations
- D.1.14 Parametric Monitoring
- D.1.15 Baghouse Inspections
- D.1.16 Cyclone Inspections
- D.1.17 Broken or Failed Bag Detection
- D.1.18 Cyclone Failure Detection

Record Keeping and Reporting Requirements [326 IAC 2-8-4(3)] [326 IAC 2-8-16]

- D.1.19 Record Keeping Requirements
- D.1.20 Reporting Requirements

SECTION D.2 FACILITY OPERATION CONDITIONS - Cold-Mix (Stockpile Mix) Production

Emission Limitations and Standards [326 IAC 2-8-4(1)]

- D.2.1 Cold-Mix (Stockpile Mix) VOC Usage [326 IAC 2-8-4]

Compliance Determination Requirements

- D.2.2 VOC Emissions

Record Keeping and Reporting Requirements [326 IAC 2-8-4(3)] [326 IAC 2-8-16]

- D.2.3 Record Keeping Requirements
- D.2.4 Reporting Requirements

SECTION D.3 FACILITY OPERATION CONDITIONS - Storage Tanks

Record Keeping and Reporting Requirements [326 IAC 2-8-4(3)] [326 IAC 2-8-16]

D.3.1 Record Keeping Requirements [326 IAC 12] [40 CFR 60.110b, Subpart Kb]

Certification Form

Emergency Occurrence Form
Daily Report Forms

Quarterly Deviation and Compliance Monitoring Report Form

SECTION A SOURCE SUMMARY

This permit is based on information requested by the Indiana Department of Environmental Management (IDEM), Office of Air Quality (OAQ). The information describing the source contained in conditions A.1 through A.3 is descriptive information and does not constitute enforceable conditions. However, the Permittee should be aware that a physical change or a change in the method of operation that may render this descriptive information obsolete or inaccurate may trigger requirements for the Permittee to obtain additional permits or seek modification of this permit pursuant to 326 IAC 2, or change other applicable requirements presented in the permit application.

A.1 General Information [326 IAC 2-8-3(b)]

The Permittee owns and operates a stationary hot mix asphalt batch plant.

Authorized Individual:	Dean K. Logan, Asphalt Plant Specialist
Source Address:	361 West U.S. Highway 6, Valparaiso, Indiana 46383
Mailing Address:	P.O. Box 477, Goshen, Indiana 46527-0477
SIC Code:	2951
Source Location Status:	Porter
County Status:	Severe nonattainment for ozone, unclassifiable for SO ₂ , and Attainment for all other criteria pollutants
Source Status:	Federally Enforceable State Operating Permit (FESOP) Minor Source, under PSD Rules Minor Source, Section 112 of the Clean Air Act

A.2 Emission Units and Pollution Control Equipment Summary [326 IAC 2-8-3(c)(3)]

This stationary source consists of the following emission units and pollution control devices:

- (a) one (1) aggregate rotary drum dryer, identified as emission unit No. 2, constructed in 1975, with a maximum capacity of 400 tons per hour, equipped with one (1) re-refined waste oil fired aggregate dryer burner with a maximum rated capacity of 118 million (MM) British thermal units (Btu) per hour using natural gas, liquefied petroleum gas, No. 2 distillate fuel oil and No. 4 distillate fuel oil as back-up fuels, and a cyclone and baghouse in series for air pollution control, exhausting at one (1) stack, identified as SV1;
- (b) one (1) drag slat hot mix conveyor and three (3) feeder conveyors;
- (c) one (1) screen;
- (d) three (3) liquid asphalt storage tanks, identified as Tanks 19A, 19B and 19C, with maximum storage capacities of 18,000, 25,000 and 25,000 gallons, respectively, with each tank exhausting at one (1) stack, identified as SV4, SV5, and SV6, respectively;
- (e) one (1) re-refined waste oil or No. 4 distillate fuel oil storage tank, identified as Tank 18, with a maximum storage capacity of 20,400 gallons, exhausting at one (1) stack identified as SV9;
- (f) one (1) No. 2 distillate fuel oil storage tank, identified as Tank 22, with a maximum storage capacity of 9,800 gallons, exhausting at one (1) stack, identified as SV10;
- (g) cold-mix (stockpile mix) asphalt storage piles, containing cutback asphalt with 10 percent diesel-like solvent by volume.

A.3 Insignificant Activities [326 IAC 2-7-1(21)] [326 IAC 2-8-3(c)(3)(I)]

This stationary source also includes the following insignificant activities, as defined in 326 IAC 2-7-1(20):

- (a) one (1) No. 2 distillate fuel oil fired hot oil heater, identified as emission unit No. 20, rated at 1.0 MMBtu per hour using natural gas and butane as back-up fuels, exhausting at one (1) stack, identified as SV2;
- (b) one (1) No. 2 distillate fuel oil fired liquid asphalt storage tank heater, identified as emission unit No. 19A, rated at 0.5 MMBtu per hour using natural gas and butane as back-up fuels, exhausting at one (1) stack, identified as SV3;
- (c) one (1) tach tank, identified as Tank 23, with a maximum storage capacity of 13,800 gallons, exhausting at one (1) stack identified as SV8;
- (d) one (1) cold feed system consisting of six (6) compartments with a total aggregate holding capacity of 180 tons;
- (e) one (1) hot aggregate bucket elevator;
- (f) one (1) hot aggregate storage bin consisting of four (4) compartments;
- (g) one (1) aggregate weigh hopper and one (1) asphalt cement weigh hopper;
- (h) one (1) pug mill mixer with a maximum hot mix holding capacity of 10,000 pounds;
- (i) three (3) hot mix storage bins, each with a maximum storage capacity of 400 tons;
- (j) one (1) dust storage bin with a capacity of 200 barrels;
- (k) one (1) Reclaimed Asphalt Pavement (RAP) feed system;
- (l) aggregate storage piles, with a total maximum storage capacity of 100,600 tons;
- (m) a petroleum fuel, other than gasoline, dispensing facility, having a storage capacity of less than or equal to 10,500 gallons, and dispensing less than or equal to 230,000 gallons per month;
- (n) vessels storing lubricating oils, hydraulic oils, machining oils, and machining fluids; and
- (o) paved and unpaved roads and parking lots with public access.

A.4 FESOP Applicability [326 IAC 2-8-2]

This stationary source, otherwise required to have a Part 70 permit as described in 326 IAC 2-7-2(a), has applied to the Indiana Department of Environmental Management (IDEM), Office of Air Quality (OAQ) to renew a Federally Enforceable State Operating Permit (FESOP).

A.5 Prior Permits Superseded [326 IAC 2-1.1-9.5]

- (a) All terms and conditions of previous permits issued pursuant to permitting programs approved into the state implementation plan have been either
 - (1) incorporated as originally stated,

(2) revised, or

(3) deleted

by this permit.

(b) All previous registrations and permits are superseded by this permit.

SECTION B GENERAL CONDITIONS

B.1 Permit No Defense [IC 13]

Indiana statutes from IC 13 and rules from 326 IAC, quoted in conditions in this permit, are those applicable at the time the permit was issued. The issuance or possession of this permit shall not alone constitute a defense against an alleged violation of any law, regulation or standard, except for the requirement to obtain a FESOP under 326 IAC 2-8.

B.2 Definitions [326 IAC 2-8-1]

Terms in this permit shall have the definition assigned to such terms in the referenced regulation. In the absence of definitions in the referenced regulation, the applicable definitions found in the statutes or regulations (IC 13-11, 326 IAC 1-2, and 326 IAC 2-7) shall prevail.

B.3 Permit Term [326 IAC 2-8-4(2)]

This permit is issued for a fixed term of five (5) years from the original date, as determined in accordance with IC 4-21.5-3-5(f) and IC 13-15-5-3. Subsequent revisions, modifications, or amendments of this permit do not affect the expiration date.

B.4 Enforceability [326 IAC 2-8-6]

Unless otherwise stated, all terms and conditions in this permit, including any provisions designed to limit the source's potential to emit, are enforceable by IDEM, the United States Environmental Protection Agency (U.S. EPA) and by citizens in accordance with the Clean Air Act.

B.5 Termination of Right to Operate [326 IAC 2-8-9] [326 IAC 2-8-3(h)]

The Permittee's right to operate this source terminates with the expiration of this permit unless a timely and complete renewal application is submitted at least nine (9) months prior to the date of expiration of the source's existing permit, consistent with 326 IAC 2-8-3(h) and 326 IAC 2-8-9.

B.6 Severability [326 IAC 2-8-4(4)]

The provisions of this permit are severable; a determination that any portion of this permit is invalid shall not affect the validity of the remainder of the permit.

B.7 Property Rights or Exclusive Privilege [326 IAC 2-8-4(5)(D)]

This permit does not convey any property rights of any sort, or any exclusive privilege.

B.8 Duty to Supplement and Provide Information [326 IAC 2-8-3(f)] [326 IAC 2-8-4(5)(E)] [326 IAC 2-8-5(a)(4)]

(a) The Permittee, upon becoming aware that any relevant facts were omitted or incorrect information was submitted in the permit application, shall promptly submit such supplementary facts or corrected information to:

Indiana Department of Environmental Management
Permits Branch, Office of Air Quality
100 North Senate Avenue, P.O. Box 6015
Indianapolis, Indiana 46206-6015

The submittal by the Permittee does require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

- (b) The Permittee shall furnish to IDEM, OAQ, within a reasonable time, any information that IDEM, OAQ, may request in writing to determine whether cause exists for modifying, revoking and reissuing, or terminating this permit, or to determine compliance with this permit. The submittal by the Permittee does require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1). Upon request, the Permittee shall also furnish to IDEM, OAQ copies of records required to be kept by this permit or, for information claimed to be confidential, the Permittee may furnish such records directly to the U. S. EPA along with a claim of confidentiality.[326 IAC 2-8-4(5)(E)]
- (c) The Permittee may include a claim of confidentiality in accordance with 326 IAC 17. When furnishing copies of requested records directly to U. S. EPA, the Permittee may assert a claim of confidentiality in accordance with 40 CFR 2, Subpart B.

B.9 Compliance Order Issuance [326 IAC 2-8-5(b)]

IDEM, OAQ may issue a compliance order to this Permittee upon discovery that this permit is in nonconformance with an applicable requirement. The order may require immediate compliance or contain a schedule for expeditious compliance with the applicable requirement.

B.10 Compliance with Permit Conditions [326 IAC 2-8-4(5)(A)] [326 IAC 2-8-4(5)(B)]

- (a) The Permittee must comply with all conditions of this permit. Noncompliance with any provisions of this permit is grounds for:
 - (1) Enforcement action;
 - (2) Permit termination, revocation and reissuance, or modification; and
 - (3) Denial of a permit renewal application.
- (b) It shall not be a defense for the Permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit.
- (c) An emergency does constitute an affirmative defense in an enforcement action provided the Permittee complies with the applicable requirements set forth in condition B, Emergency Provisions.

B.11 Certification [326 IAC 2-8-3(d)] [326 IAC 2-8-4(3)(C)(i)] [326 IAC 2-8-5(1)]

- (a) Where specifically designated by this permit or required by an applicable requirement, any application form, report, or compliance certification submitted shall contain certification by an authorized individual of truth, accuracy, and completeness. This certification, shall state that, based on information and belief formed after reasonable inquiry, the statements and information in the document are true, accurate, and complete.
- (b) One (1) certification shall be included, using the attached Certification Form, with each submittal requiring certification.
- (c) An authorized individual is defined at 326 IAC 2-1.1-1(1).

B.12 Annual Compliance Certification [326 IAC 2-8-5(a)(1)]

- (a) The Permittee shall annually submit a compliance certification report which addresses the status of the source's compliance with the terms and conditions contained in this permit, including emission limitations, standards, or work practices. All certifications shall cover the time period from January 1 to December 31 of the previous year, and shall be submitted in letter form no later than July 1 of each year to:

Indiana Department of Environmental Management
Compliance Branch, Office of Air Quality
100 North Senate Avenue, P.O. Box 6015
Indianapolis, Indiana 46206-6015

- (b) The annual compliance certification report required by this permit shall be considered timely if the date postmarked on the envelope or certified mail receipt, or affixed by the shipper on the private shipping receipt, is on or before the date it is due. If the document is submitted by any other means, it shall be considered timely if received by IDEM, OAQ on or before the date it is due.
- (c) The annual compliance certification report shall include the following:
 - (1) The appropriate identification of each term or condition of this permit that is the basis of the certification;
 - (2) The compliance status;
 - (3) Whether compliance was continuous or intermittent;
 - (4) The methods used for determining the compliance status of the source, currently and over the reporting period consistent with 326 IAC 2-8-4(3); and
 - (5) Such other facts as specified in Sections D of this permit, IDEM, OAQ, may require to determine the compliance status of the source.

The notification which shall be submitted by the Permittee does require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

B.13 Preventive Maintenance Plan [326 IAC 1-6-3] [326 IAC 2-8-4(9)] [326 IAC 2-8-5(a)(1)]

- (a) If required by specific condition(s) in Section D of this permit, the Permittee shall maintain and implement Preventive Maintenance Plans (PMPs), including the following information on each facility:
 - (1) Identification of the individual(s) responsible for inspecting, maintaining, and repairing emission control devices;
 - (2) A description of the items or conditions that will be inspected and the inspection schedule for said items or conditions; and
 - (3) Identification and quantification of the replacement parts that will be maintained in inventory for quick replacement.
- (b) The Permittee shall implement the PMPs as necessary to ensure that failure to implement a PMP does not cause or contribute to a violation of any limitation on emissions or potential to emit.
- (c) A copy of the PMPs shall be submitted to IDEM, OAQ, upon request and within a reasonable time, and shall be subject to review and approval by IDEM, OAQ, . IDEM, OAQ, may require the Permittee to revise its PMPs whenever lack of proper maintenance causes or contributes to any violation. The PMP does not require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

- (d) Records of preventive maintenance shall be retained for a period of at least five (5) years. These records shall be kept at the source location for a minimum of three (3) years. The records may be stored elsewhere for the remaining two (2) years as long as they are available upon request. If the Commissioner makes a request for records to the Permittee, the Permittee shall furnish the records to the Commissioner within a reasonable time.

B.14 Emergency Provisions [326 IAC 2-8-12]

- (a) An emergency, as defined in 326 IAC 2-7-1(12), is not an affirmative defense for an action brought for noncompliance with a federal or state health-based emission limitation, except as provided in 326 IAC 2-8-12.
- (b) An emergency, as defined in 326 IAC 2-7-1(12), constitutes an affirmative defense to an action brought for noncompliance with a health-based or technology-based emission limitation if the affirmative defense of an emergency is demonstrated through properly signed, contemporaneous operating logs or other relevant evidence that describes the following:
 - (1) An emergency occurred and the Permittee can, to the extent possible, identify the causes of the emergency;
 - (2) The permitted facility was at the time being properly operated;
 - (3) During the period of an emergency, the Permittee took all reasonable steps to minimize levels of emissions that exceeded the emission standards or other requirements in this permit;
 - (4) For each emergency lasting one (1) hour or more, the Permittee notified IDEM, OAQ within four (4) daytime business hours after the beginning of the emergency, or after the emergency was discovered or reasonably should have been discovered;

Telephone No.: 1-800-451-6027 (ask for Office of Air Quality, Compliance Section) or,
Telephone No.: 317-233-5674 (ask for Compliance Section)
Facsimile No.: 317-233-5967

Failure to notify IDEM, OAQ by telephone or facsimile within four (4) daytime business hours after the beginning of the emergency, or after the emergency is discovered or reasonably should have been discovered, shall constitute a violation of 326 IAC 2-8 and any other applicable rules. [326 IAC 2-8-12(f)]

- (5) For each emergency lasting one (1) hour or more, the Permittee submitted the attached Emergency Occurrence Report Form or its equivalent, either by mail or facsimile to:

Indiana Department of Environmental Management
Compliance Branch, Office of Air Quality
100 North Senate Avenue, P.O. Box 6015
Indianapolis, Indiana 46206-6015

within two (2) working days of the time when emission limitations were exceeded due to the emergency.

The notice fulfills the requirement of 326 IAC 2-8-4(3)(C)(ii) and must contain the following:

- (A) A description of the emergency;
- (B) Any steps taken to mitigate the emissions; and
- (C) Corrective actions taken.

The notification which shall be submitted by the Permittee does not require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

- (6) The Permittee immediately took all reasonable steps to correct the emergency.
- (c) In any enforcement proceeding, the Permittee seeking to establish the occurrence of an emergency has the burden of proof.
- (d) This emergency provision supersedes 326 IAC 1-6 (Malfunctions). This permit condition is in addition to any emergency or upset provision contained in any applicable requirement.
- (e) IDEM, OAQ , may require that the Preventive Maintenance Plans required under 326 IAC 2-8-3(c)(6) be revised in response to an emergency.
- (f) Failure to notify IDEM, OAQ , by telephone or facsimile of an emergency lasting more than one (1) hour in accordance with (b)(4) and (5) of this condition shall constitute a violation of 326 IAC 2-8 and any other applicable rules.
- (g) Operations may continue during an emergency only if the following conditions are met:
 - (1) If the emergency situation causes a deviation from a technology-based limit, the Permittee may continue to operate the affected emitting facilities during the emergency provided the Permittee immediately takes all reasonable steps to correct the emergency and minimize emissions.
 - (2) If an emergency situation causes a deviation from a health-based limit, the Permittee may not continue to operate the affected emissions facilities unless:
 - (A) The Permittee immediately takes all reasonable steps to correct the emergency situation and to minimize emissions; and
 - (B) Continued operation of the facilities is necessary to prevent imminent injury to persons, severe damage to equipment, substantial loss of capital investment, or loss of product or raw material of substantial economic value.

Any operations shall continue no longer than the minimum time required to prevent the situations identified in (g)(2)(B) of this condition.

B.15 Deviations from Permit Requirements and Conditions [326 IAC 2-8-4(3)(C)(ii)]

- (a) Deviations from any permit requirements (for emergencies see Section B - Emergency Provisions), the probable cause of such deviations, and any response steps or preventive measures taken shall be reported to:

Indiana Department of Environmental Management
Compliance Data Section, Office of Air Quality
100 North Senate Avenue, P.O. Box 6015
Indianapolis, Indiana 46206-6015

using the attached Quarterly Deviation and Compliance Monitoring Report, or its equivalent. A deviation required to be reported pursuant to an applicable requirement that exists independent of this permit, shall be reported according to the schedule stated in the applicable requirement and does not need to be included in this report.

The Quarterly Deviation and Compliance Monitoring Report does require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

- (b) A deviation is an exceedance of a permit limitation or a failure to comply with a requirement of the permit.
- (c) Emergencies shall be included in the Quarterly Deviation and Compliance Monitoring Report.

**B.16 Permit Modification, Reopening, Revocation and Reissuance, or Termination
[326 IAC 2-8-4(5)(C)] [326 IAC 2-8-7(a)] [326 IAC 2-8-8]**

- (a) This permit may be modified, reopened, revoked and reissued, or terminated for cause. The filing of a request by the Permittee for a FESOP modification, revocation and reissuance, or termination, or of a notification of planned changes or anticipated noncompliance does not stay any condition of this permit. [326 IAC 2-8-4(5)(C)] The notification by the Permittee does require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).
- (b) This permit shall be reopened and revised under any of the circumstances listed in IC 13-15-7-2 or if IDEM, OAQ determines any of the following:
- (1) That this permit contains a material mistake.
 - (2) That inaccurate statements were made in establishing the emissions standards or other terms or conditions.
 - (3) That this permit must be revised or revoked to assure compliance with an applicable requirement. [326 IAC 2-8-8(a)]
- (c) Proceedings by IDEM, OAQ, to reopen and revise this permit shall follow the same procedures as apply to initial permit issuance and shall affect only those parts of this permit for which cause to reopen exists. Such reopening and revision shall be made as expeditiously as practicable. [326 IAC 2-8-8(b)]
- (d) The reopening and revision of this permit, under 326 IAC 2-8-8(a), shall not be initiated before notice of such intent is provided to the Permittee by IDEM, OAQ, at least thirty (30) days in advance of the date this permit is to be reopened, except that IDEM, OAQ, may provide a shorter time period in the case of an emergency. [326 IAC 2-8-8(c)]

B.17 Permit Renewal [326 IAC 2-8-3(h)]

- (a) The application for renewal shall be submitted using the application form or forms prescribed by IDEM, OAQ and shall include the information specified in 326 IAC 2-8-3. Such information shall be included in the application for each emission unit at this source, except those emission units included on the trivial or insignificant activities list contained in 326 IAC 2-7-1(21) and 326 IAC 2-7-1(40). The renewal application does require the certification by the “authorized individual” as defined by 326 IAC 2-1.1-1(1).

Request for renewal shall be submitted to:

Indiana Department of Environmental Management
Permits Branch, Office of Air Quality
100 North Senate Avenue, P.O. Box 6015
Indianapolis, IN 46206-6015

- (b) Timely Submittal of Permit Renewal [326 IAC 2-8-3]

- (1) A timely renewal application is one that is:

- (A) Submitted at least nine (9) months prior to the date of the expiration of this permit; and
- (B) If the date postmarked on the envelope or certified mail receipt, or affixed by the shipper on the private shipping receipt, is on or before the date it is due. If the document is submitted by any other means, it shall be considered timely if received by IDEM, OAQ, on or before the date it is due.

- (2) If IDEM, OAQ upon receiving a timely and complete permit application, fails to issue or deny the permit renewal prior to the expiration date of this permit, this existing permit shall not expire and all terms and conditions shall continue in effect until the renewal permit has been issued or denied.

- (c) Right to Operate After Application for Renewal [326 IAC 2-8-9]
If the Permittee submits a timely and complete application for renewal of this permit, the source's failure to have a permit is not a violation of 326 IAC 2-8 until IDEM, OAQ takes final action on the renewal application, except that this protection shall cease to apply if, subsequent to the completeness determination, the Permittee fails to submit by the deadline specified in writing by IDEM, OAQ, any additional information identified as needed to process the application.

B.18 Permit Amendment or Revision [326 IAC 2-8-10] [326 IAC 2-8-11.1]

- (a) Permit amendments and revisions are governed by the requirements of 326 IAC 2-8-10 or 326 IAC 2-8-11.1 whenever the Permittee seeks to amend or modify this permit.
- (b) Any application requesting an amendment or modification of this permit shall be submitted to:

Indiana Department of Environmental Management
Permits Branch, Office of Air Quality
100 North Senate Avenue, P.O. Box 6015
Indianapolis, Indiana 46206-6015

Any such application should be certified by the “authorized individual” as defined by 326 IAC 2-1.1-1(1).

- (c) The Permittee may implement the administrative amendment changes addressed in the request for an administrative amendment immediately upon submittal of the request. [326 IAC 2-8-10(b)(3)]

B.19 Operational Flexibility [326 IAC 2-8-15]

- (a) The Permittee may make any change or changes at this source that are described in 326 IAC 2-8-15(b) through (d), without prior permit revision, if each of the following conditions is met:
 - (1) The changes are not modifications under any provision of Title I of the Clean Air Act;
 - (2) Any approval required by 326 IAC 2-8-11.1 has been obtained;
 - (3) The changes do not result in emissions which exceed the emissions allowable under this permit (whether expressed herein as a rate of emissions or in terms of total emissions);
 - (4) The Permittee notifies the:

Indiana Department of Environmental Management
Permits Branch, Office of Air Quality
100 North Senate Avenue, P.O. Box 6015
Indianapolis, Indiana 46206-6015

and

United States Environmental Protection Agency, Region V
Air and Radiation Division, Regulation Development Branch - Indiana (AR-18J)
77 West Jackson Boulevard
Chicago, Illinois 60604-3590

in advance of the change by written notification at least ten (10) days in advance of the proposed change. The Permittee shall attach every such notice to the Permittee's copy of this permit; and
 - (5) The Permittee maintains records on-site which document, on a rolling five (5) year basis, all such changes and emissions trading that are subject to 326 IAC 2-8-15(b) through (d) and makes such records available, upon reasonable request, to public review.

Such records shall consist of all information required to be submitted to IDEM, OAQ , in the notices specified in 326 IAC 2-8-15(b), (c)(1), and (d).
- (b) The Permittee may make Section 502(b)(10) of the Clean Air Act changes (this term is defined at 326 IAC 2-7-1(36)) without a permit revision, subject to the constraint of 326 IAC 2-8-15(a) and the following additional conditions:
 - (1) A brief description of the change within the source;
 - (2) The date on which the change will occur;
 - (3) Any change in emissions; and
 - (4) Any permit term or condition that is no longer applicable as a result of the change.

The notification which shall be submitted by the Permittee does not require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1.

- (c) Emission Trades [326 IAC 2-8-15(c)]
The Permittee may trade increases and decreases in emissions in the source, where the applicable SIP provides for such emission trades without requiring a permit revision, subject to the constraints of Section (a) of this condition and those in 326 IAC 2-8-15(c).
- (d) Alternative Operating Scenarios [326 IAC 2-8-15(d)]
The Permittee may make changes at the source within the range of alternative operating scenarios that are described in the terms and conditions of this permit in accordance with 326 IAC 2-8-4(7). No prior notification of IDEM, OAQ or U.S. EPA is required.
- (e) Back-up fuel switches and the manufacture of stockpile mix addressed in (and if necessary limited under) Section D of this permit shall not be considered Alternative Operating Scenarios. Therefore, the notification requirements of part (a) of this condition do not apply.

B.20 Permit Revision Requirement [326 IAC 2-8-11.1]

A modification, construction, or reconstruction is governed by the requirements of 326 IAC 2 and 326 IAC 2-8-11.1.

B.21 Inspection and Entry [326 IAC 2-8-5(a)(2)] [IC 13-14-2-2]

Upon presentation of proper identification cards, credentials, and other documents as may be required by law, and subject to the Permittee's right under all applicable laws and regulations to assert that the information collected by the agency is confidential and entitled to be treated as such, the Permittee shall allow IDEM, OAQ, U.S. EPA, or an authorized representative to perform the following:

- (a) Enter upon the Permittee's premises where a FESOP source is located, or emissions related activity is conducted, or where records must be kept under the conditions of this permit;
- (b) Have access to and copy, at reasonable times, any records that must be kept under the conditions of this permit;
- (c) Inspect, at reasonable times, any facilities, equipment (including monitoring and air pollution control equipment), practices, or operations regulated or required under this permit;
- (d) Sample or monitor, at reasonable times, substances or parameters for the purpose of assuring compliance with this permit or applicable requirements; and
- (e) Utilize any photographic, recording, testing, monitoring, or other equipment for the purpose of assuring compliance with this permit or applicable requirements.

B.22 Transfer of Ownership or Operational Control [326 IAC 2-8-10]

- (a) The Permittee must comply with the requirements of 326 IAC 2-8-10 whenever the Permittee seeks to change the ownership or operational control of the source and no other change in the permit is necessary.

- (b) Any application requesting a change in the ownership or operational control of the source shall contain a written agreement containing a specific date for transfer of permit responsibility, coverage and liability between the current and new Permittee. The application shall be submitted to:

Indiana Department of Environmental Management
Permits Branch, Office of Air Quality
100 North Senate Avenue, P.O. Box 6015
Indianapolis, Indiana 46206-6015

The application which shall be submitted by the Permittee does require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

- (c) The Permittee may implement administrative amendment changes addressed in the request for an administrative amendment immediately upon submittal of the request. [326 IAC 2-8-11(b)(3)]

B.23 Annual Fee Payment [326 IAC 2-7-19] [326 IAC 2-8-4(6)] [326 IAC 2-8-16]

- (a) The Permittee shall pay annual fees to IDEM, OAQ, within thirty (30) calendar days of receipt of a billing. Pursuant to 326 IAC 2-7-19(b), if the Permittee does not receive a bill from IDEM, OAQ the applicable fee is due April 1 of each year.
- (b) Failure to pay may result in administrative enforcement action, or revocation of this permit.
- (c) The Permittee may call the following telephone numbers: 1-800-451-6027 or 317-233-0425 (ask for OAQ, Technical Support and Modeling Section), to determine the appropriate permit fee.

SECTION C SOURCE OPERATION CONDITIONS

Entire Source

Emissions Limitations and Standards [326 IAC 2-8-4(1)]

C.1 Overall Source Limit [326 IAC 2-8]

The purpose of this permit is to limit this source's potential to emit to less than major source levels for the purpose of Section 502(a) of the Clean Air Act.

(a) Pursuant to 326 IAC 2-8:

- (1) The potential to emit volatile organic compounds (VOCs) from the entire source shall be limited to less than twenty-five (25) tons per 365 day period, rolled on a daily basis. This limitation shall also satisfy the requirements of 326 IAC 2-3 (Emission Offset);
- (2) The potential to emit any regulated pollutant from the entire source, except particulate matter (PM) and volatile organic compounds (VOCs), shall be limited to less than one-hundred (100) tons per twelve (12) consecutive month period;
- (3) The potential to emit any individual hazardous air pollutant (HAP) from the entire source shall be limited to less than ten (10) tons per twelve (12) consecutive month period; and
- (4) The potential to emit any combination of HAPs from the entire source shall be limited to less than twenty-five (25) tons per twelve (12) consecutive month period.

(b) Pursuant to 326 IAC 2-3 (Emission Offset), potential to emit particulate matter (PM) from the entire source shall be limited to less than one-hundred (100) tons per twelve (12) consecutive month period.

(c) This condition shall include all emission points at this source including those that are insignificant as defined in 326 IAC 2-7-1(21). The source shall be allowed to add insignificant activities not already listed in this permit, provided the source's potential to emit does not exceed the above specified limits.

(d) Section D of this permit contains independently enforceable provisions to satisfy this requirement.

C.2 Particulate Matter Emission Limitations For Processes with Process Weight Rates Less Than One Hundred (100) pounds per hour [326 IAC 6-3-2(c)]

Pursuant to 326 IAC 6-3-2(c), the allowable particulate matter emissions rate from any process not already regulated by 326 IAC 6-1 or any New Source Performance Standard, and which has a maximum process weight rate less than 100 pounds per hour shall not exceed 0.551 pounds per hour.

C.3 Opacity [326 IAC 5-1]

Pursuant to 326 IAC 5-1-2 (Opacity Limitations), except as provided in 326 IAC 5-1-3 (Temporary Alternative Opacity Limitations), opacity shall meet the following, unless otherwise stated in this permit:

- (a) Opacity shall not exceed an average of forty percent (40%) in any one (1) six (6) minute averaging period as determined in 326 IAC 5-1-4.

- (b) Opacity shall not exceed sixty percent (60%) for more than a cumulative total of fifteen (15) minutes (sixty (60) readings as measured according to 40 CFR 60, Appendix A, Method 9 or fifteen (15) one (1) minute nonoverlapping integrated averages for a continuous opacity monitor) in a six (6) hour period.

C.4 Open Burning [326 IAC 4-1] [IC 13-17-9]

The Permittee shall not open burn any material except as provided in 326 IAC 4-1-3, 326 IAC 4-1-4 or 326 IAC 4-1-6. The previous sentence notwithstanding, the Permittee may open burn in accordance with an open burning approval issued by the Commissioner under 326 IAC 4-1-4.1.

C.5 Incineration [326 IAC 4-2] [326 IAC 9-1-2(3)]

The Permittee shall not operate an incinerator or incinerate any waste or refuse except as provided in 326 IAC 4-2 and in 326 IAC 9-1-2.

C.6 Fugitive Dust Emissions [326 IAC 6-4]

The Permittee shall not allow fugitive dust to escape beyond the property line or boundaries of the property, right-of-way, or easement on which the source is located, in a manner that would violate 326 IAC 6-4 (Fugitive Dust Emissions).

C.7 Operation of Equipment [326 IAC 2-8-5(a)(4)]

Except as otherwise provided by statute, rule or in this permit, all air pollution control equipment listed in this permit and used to comply with an applicable requirement shall be operated at all times that the emission unit(s) vented to the control equipment is (are) in operation.

C.8 Stack Height [326 IAC 1-7]

The Permittee shall comply with the applicable provisions of 326 IAC 1-7 (Stack Height Provisions), for all exhaust stacks through which a potential (before controls) of twenty-five (25) tons per year or more of particulate matter or sulfur dioxide is emitted.

C.9 Asbestos Abatement Projects [326 IAC 14-10] [326 IAC 18] [40 CFR 61, Subpart M]

- (a) Notification requirements apply to each owner or operator. If the combined amount of regulated asbestos containing material (RACM) to be stripped, removed or disturbed is at least 260 linear feet on pipes or 160 square feet on other facility components, or at least thirty-five (35) cubic feet on all facility components, then the notification requirements of 326 IAC 14-10-3 are mandatory. All demolition projects require notification whether or not asbestos is present.
- (b) The Permittee shall ensure that a written notification is sent on a form provided by the Commissioner at least ten (10) working days before asbestos stripping or removal work or before demolition begins, per 326 IAC 14-10-3, and shall update such notice as necessary, including, but not limited to the following:
 - (1) When the amount of affected asbestos containing material increases or decreases by at least twenty percent (20%); or
 - (2) If there is a change in the following:
 - (A) Asbestos removal or demolition start date;
 - (B) Removal or demolition contractor; or
 - (C) Waste disposal site.
- (c) The Permittee shall ensure that the notice is postmarked or delivered according to the guidelines set forth in 326 IAC 14-10-3(2).

- (d) The notice to be submitted shall include the information enumerated in 326 IAC 14-10-3(3).

All required notifications shall be submitted to:

Indiana Department of Environmental Management
Asbestos Section, Office of Air Quality
100 North Senate Avenue, P.O. Box 6015
Indianapolis, Indiana 46206-6015

The notice shall include a signed certification from the owner or operator that the information provided in this notification is correct and that only Indiana licensed workers and project supervisors will be used to implement the asbestos removal project. The notifications do not require a certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

- (e) Procedures for Asbestos Emission Control
The Permittee shall comply with the applicable emission control procedures in 326 IAC 14-10-4 and 40 CFR 61.145(c). Per 326 IAC 14-10-4 emission control requirements are applicable for any removal or disturbance of RACM greater than three (3) linear feet on pipes or three (3) square feet on any other facility components or a total of at least 0.75 cubic feet on all facility components.
- (f) Indiana Accredited Asbestos Inspector
The Permittee shall comply with 326 IAC 14-10-1(a) that requires the owner or operator, prior to a renovation/demolition, to use an Indiana Accredited Asbestos Inspector to thoroughly inspect the affected portion of the facility for the presence of asbestos. The requirement that the inspector be accredited is federally enforceable.

Testing Requirements [326 IAC 2-8-4(3)]

C.10 Performance Testing [326 IAC 3-6]

- (a) All testing shall be performed according to the provisions of 326 IAC 3-6 (Source Sampling Procedures), except as provided elsewhere in this permit, utilizing any applicable procedures and analysis methods specified in 40 CFR 51, 40 CFR 60, 40 CFR 61, 40 CFR 63, 40 CFR 75, or other procedures approved by IDEM, OAQ.

A test protocol, except as provided elsewhere in this permit, shall be submitted to:

Indiana Department of Environmental Management
Compliance Data Section, Office of Air Quality
100 North Senate Avenue, P. O. Box 6015
Indianapolis, Indiana 46206-6015

no later than thirty-five (35) days prior to the intended test date. The protocol submitted by the Permittee does not require certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

- (b) The Permittee shall notify IDEM, OAQ of the actual test date at least fourteen (14) days prior to the actual test date. The notification submitted by the Permittee does not require certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

- (c) Pursuant to 326 IAC 3-6-4(b), all test reports must be received by IDEM, OAQ not later than forty-five (45) days after the completion of the testing. An extension may be granted by IDEM, OAQ, if the source submits to IDEM, OAQ, a reasonable written explanation not later than five (5) days prior to the end of the initial forty-five (45) day period.

Compliance Requirements [326 IAC 2-1.1-11]

C.11 Compliance Requirements [326 IAC 2-1.1-11]

The commissioner may require stack testing, monitoring, or reporting at any time to assure compliance with all applicable requirements. Any monitoring or testing shall be performed in accordance with 326 IAC 3 or other methods approved by the commissioner or the U. S. EPA.

Compliance Monitoring Requirements [326 IAC 2-8-4] [326 IAC 2-8-5(a)(1)]

C.12 Compliance Monitoring [326 IAC 2-8-4(3)] [326 IAC 2-8-5(a)(1)]

Unless otherwise specified in this permit, all monitoring and record keeping requirements not already legally required shall be implemented upon issuance of this permit. If required by Section D, the Permittee shall be responsible for installing any necessary equipment and initiating any required monitoring related to that equipment.

Unless otherwise specified in the approval for the new emissions unit, compliance monitoring for new emission units or emission units added through a permit revision shall be implemented when operation begins.

C.13 Maintenance of Emission Monitoring Equipment [326 IAC 2-8-4(3)(A)(iii)]

- (a) In the event that a breakdown of the emission monitoring equipment occurs, a record shall be made of the times and reasons of the breakdown and efforts made to correct the problem. To the extent practicable, supplemental or intermittent monitoring of the parameter should be implemented at intervals no less frequent than required in Section D of this permit until such time as the monitoring equipment is back in operation. In the case of continuous monitoring, supplemental or intermittent monitoring of the parameter should be implemented at intervals no often less than once an hour until such time as the continuous monitor is back in operation.
- (b) The Permittee shall install, calibrate, quality assure, maintain, and operate all necessary monitors and related equipment. In addition, prompt corrective action shall be initiated whenever indicated.

C.14 Monitoring Methods [326 IAC 3] [40 CFR 60] [40 CFR 63]

Any monitoring or testing performed required by Section D of this permit shall be performed according to the provisions of 326 IAC 3, 40 CFR 60, Appendix A, 40 CFR 60 Appendix B, 40 CFR 63 or other approved methods as specified in this permit.

C.15 Pressure Gauge and Other Instrument Specifications [326 IAC 2-1.1-11] [326 IAC 2-8-4(3)] [326 IAC 2-8-5(1)]

- (a) Whenever a condition in this permit requires the measurement of pressure drop across any part of the unit or its control device, the gauge employed shall have a scale such that the expected normal reading shall be no less than twenty percent (20%) of full scale and be accurate within plus or minus two percent ($\pm 2\%$) of full scale reading.
- (b) The Permittee may request the IDEM, OAQ approve the use of a pressure gauge or other instrument that does not meet the above specifications provided the Permittee can demonstrate an alternative pressure gauge or other instrument specification will adequately ensure compliance with permit conditions requiring the measurement of pressure drop or other parameters.

Corrective Actions and Response Steps [326 IAC 2-8-4] [326 IAC 2-8-5(a)(1)]

C.16 Emergency Reduction Plans [326 IAC 1-5-2] [326 IAC 1-5-3]

Pursuant to 326 IAC 1-5-2 (Emergency Reduction Plans; Submission):

- (a) The Permittee shall prepare written emergency reduction plans (ERPs) consistent with safe operating procedures.

- (b) These ERPs shall be submitted for approval to:

Indiana Department of Environmental Management
Compliance Branch, Office of Air Quality
100 North Senate Avenue, P.O. Box 6015
Indianapolis, Indiana 46206-6015

within ninety (90) days from the date of issuance of this permit.

The ERP does require the certification by the “authorized individual” as defined by 326 IAC 2-1.1-1(1).

- (c) If the ERP is disapproved by IDEM, OAQ, the Permittee shall have an additional thirty (30) days to resolve the differences and submit an approvable ERP.
- (d) These ERPs shall state those actions that will be taken, when each episode level is declared, to reduce or eliminate emissions of the appropriate air pollutants.
- (e) Said ERPs shall also identify the sources of air pollutants, the approximate amount of reduction of the pollutants, and a brief description of the manner in which the reduction will be achieved.
- (f) Upon direct notification by IDEM, OAQ, that a specific air pollution episode level is in effect, the Permittee shall immediately put into effect the actions stipulated in the approved ERP for the appropriate episode level. [326 IAC 1-5-3]

C.17 Risk Management Plan [326 IAC 2-8-4] [40 CFR 68.215]

If a regulated substance, subject to 40 CFR 68, is present at a source in more than a threshold quantity, 40 CFR 68 is an applicable requirement and the Permittee shall submit:

- (a) A compliance schedule for meeting the requirements of 40 CFR 68; or
- (b) As a part of the annual compliance certification submitted under 326 IAC 2-7-6(5), a certification statement that the source is in compliance with all the requirements of 40 CFR 68, including the registration and submission of a Risk Management Plan (RMP).

All documents submitted pursuant to this condition shall include the certification by the “authorized individual” as defined by 326 IAC 2-1.1-1(1).

C.18 Compliance Response Plan - Preparation, Implementation, Records, and Reports
[326 IAC 2-8-4] [326 IAC 2-8-5]

- (a) The Permittee is required to prepare a Compliance Response Plan (CRP) for each compliance monitoring condition of this permit. A CRP shall be submitted to IDEM, OAQ upon request. The CRP shall be prepared within ninety (90) days after issuance of this permit by the Permittee, supplemented from time to time by the Permittee, maintained on site, and comprised of:
 - (1) Reasonable response steps that may be implemented in the event that a response step is needed pursuant to the requirements of Section D of this permit; and an expected timeframe for taking reasonable response steps.
 - (2) If, at any time, the Permittee takes reasonable response steps that are not set forth in the Permittee's current Compliance Response Plan and the Permittee documents such response in accordance with subsection (e) below, the Permittee shall amend its Compliance Response Plan to include such response steps taken.
- (b) For each compliance monitoring condition of this permit, reasonable response steps shall be taken when indicated by the provisions of that compliance monitoring condition as follows:
 - (1) Reasonable response steps shall be taken as set forth in the Permittee's current Compliance Response Plan; or
 - (2) If none of the reasonable response steps listed in the Compliance Response Plan is applicable or responsive to the excursion, the Permittee shall devise and implement additional response steps as expeditiously as practical. Taking such additional response steps shall not be considered a deviation from this permit so long as the Permittee documents such response steps in accordance with this condition.
 - (3) If the Permittee determines that additional response steps would necessitate that the emissions unit or control device be shut down, the IDEM, OAQ shall be promptly notified of the expected date of the shut down, the status of the applicable compliance monitoring parameter with respect to normal, and the results of the actions taken up to the time of notification.
 - (4) Failure to take reasonable response steps shall constitute a violation of the permit.
- (c) The Permittee is not required to take any further response steps for any of the following reasons:
 - (1) A false reading occurs due to the malfunction of the monitoring equipment and prompt action was taken to correct the monitoring equipment.
 - (2) The Permittee has determined that the compliance monitoring parameters established in the permit conditions are technically inappropriate, has previously submitted a request for an administrative amendment to the permit, and such request has not been denied.
 - (3) An automatic measurement was taken when the process was not operating.
 - (4) The process has already returned or is returning to operating within "normal" parameters and no response steps are required.

- (d) When implementing reasonable steps in response to a compliance monitoring condition, if the Permittee determines that an exceedance of an emission limitation has occurred, the Permittee shall report such deviations pursuant to Section B-Deviations from Permit Requirements and Conditions.
- (e) The Permittee shall record all instances when response steps are taken. In the event of an emergency, the provisions of 326 IAC 2-7-16 (Emergency Provisions) requiring prompt corrective action to mitigate emissions shall prevail.
- (f) Except as otherwise provided by a rule or provided specifically in Section D, all monitoring as required in Section D shall be performed when the emission unit is operating, except for time necessary to perform quality assurance and maintenance activities.

**C.19 Actions Related to Noncompliance Demonstrated by a Stack Test [326 IAC 2-8-4]
[326 IAC 2-8-5]**

- (a) When the results of a stack test performed in conformance with Section C - Performance Testing, of this permit exceed the level specified in any condition of this permit, the Permittee shall take appropriate response actions. The Permittee shall submit a description of these response actions to IDEM, OAQ, within thirty (30) days of receipt of the test results. The Permittee shall take appropriate action to minimize excess emissions from the affected facility while the response actions are being implemented.
- (b) A retest to demonstrate compliance shall be performed within one hundred twenty (120) days of receipt of the original test results. Should the Permittee demonstrate to IDEM, OAQ that retesting in one-hundred and twenty (120) days is not practicable, IDEM, OAQ may extend the retesting deadline.
- (c) IDEM, OAQ reserves the authority to take any actions allowed under law in response to noncompliant stack tests.

The documents submitted pursuant to this condition do require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

Record Keeping and Reporting Requirements [326 IAC 2-8-4(3)]

C.20 Emission Statement [326 IAC 2-6] [326 IAC 2-8-4(3)]

- (a) The Permittee shall submit an emission statement certified pursuant to the requirements of 326 IAC 2-6. This statement must be received in accordance with the compliance schedule specified in 326 IAC 2-6-3 and must comply with the minimum requirements specified in 326 IAC 2-6-4. The submittal should cover the period defined in 326 IAC 2-6-2(8). The statement must be submitted to:

Indiana Department of Environmental Management
Technical Support and Modeling Section, Office of Air Quality
100 North Senate Avenue, P.O. Box 6015
Indianapolis, Indiana 46206-6015

The emission statement does require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

- (b) The emission statement required by this permit shall be considered timely if the date postmarked on the envelope or certified mail receipt, or affixed by the shipper on the private shipping receipt, is on or before the date it is due. If the document is submitted by any other means, it shall be considered timely if received by IDEM, OAQ, on or before the date it is due.

C.21 General Record Keeping Requirements [326 IAC 2-8-4(3)] [326 IAC 2-8-5]

- (a) Records of all required data, reports and support information shall be retained for a period of at least five (5) years from the date of monitoring sample, measurement, report, or application. These records shall be kept at the source location for a minimum of three (3) years. The records may be stored elsewhere for the remaining two (2) years as long as they are available upon request. If the Commissioner makes a request for records to the Permittee, the Permittee shall furnish the records to the Commissioner within a reasonable time.
- (b) Unless otherwise specified in this permit, all record keeping requirements not already legally required shall be implemented within ninety (90) days of permit issuance.

C.22 General Reporting Requirements [326 IAC 2-8-4(3)(C)] [326 IAC 2-1.1-11]

- (a) The source shall submit the attached Quarterly Deviation and Compliance Monitoring Report or its equivalent. Any deviation from permit requirements, the date(s) of each deviation, the cause of the deviation, and the response steps taken must be reported. This report shall be submitted within thirty (30) days of the end of the reporting period. The Quarterly Deviation and Compliance Monitoring Report shall include the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).
- (b) The report required in (a) of this condition and reports required by conditions in Section D of this permit shall be submitted to:

Indiana Department of Environmental Management
Compliance Data Section, Office of Air Quality
100 North Senate Avenue, P. O. Box 6015
Indianapolis, Indiana 46206-6015
- (c) Unless otherwise specified in this permit, any notice, report, or other submission required by this permit shall be considered timely if the date postmarked on the envelope or certified mail receipt, or affixed by the shipper on the private shipping receipt, is on or before the date it is due. If the document is submitted by any other means, it shall be considered timely if received by IDEM, OAQ, on or before the date it is due.
- (d) Unless otherwise specified in this permit, any monthly report required in Section D of this permit shall be submitted within thirty (30) days of the end of the reporting period. The report(s) does(do) require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).
- (e) Reporting periods are based on calendar years.

Stratospheric Ozone Protection

C.23 Compliance with 40 CFR 82 and 326 IAC 22-1

Pursuant to 40 CFR 82 (Protection of Stratospheric Ozone), Subpart F, except as provided for motor vehicle air conditioners in Subpart B, the Permittee shall comply with the standards for recycling and emissions reduction:

- (a) Persons opening appliances for maintenance, service, repair or disposal must comply with the required practices pursuant to 40 CFR 82.156

- (b) Equipment used during the maintenance, service, repair or disposal of appliances must comply with the standards for recycling and recovery equipment pursuant to 40 CFR 82.158.
- (c) Persons performing maintenance, service, repair or disposal of appliances must be certified by an approved technician certification program pursuant to 40 CFR 82.161.

SECTION D.1

FACILITY OPERATION CONDITIONS

Facility Description [326 IAC 2-8-4(10)]:

- (a) one (1) aggregate rotary drum dryer, identified as emission unit No. 2, constructed in 1975, with a maximum capacity of 400 tons per hour, equipped with one (1) re-refined waste oil fired aggregate dryer burner with a maximum rated capacity of 118 million (MM) British thermal units (Btu) per hour using natural gas, liquefied petroleum gas, No. 2 distillate fuel oil and No. 4 distillate fuel oil as back-up fuels, and a cyclone and baghouse in series for air pollution control, exhausting at one (1) stack, identified as SV1;

(The information describing the process contained in this facility description box is descriptive information and does not constitute enforceable conditions.)

Emissions Limitations and Standards [326 IAC 2-8-4(1)] [326 IAC 12] [40 CFR Part 60.90]

D.1.1 General Provisions Relating to NSPS [326 IAC 12-1][40 CFR Part 60, Subpart A]

The provisions of 40 CFR Part 60, Subpart A - General Provisions, which are incorporated by reference in 326 IAC 12-1, apply to the facilities described in this section except when otherwise specified in 40 CFR Part 60, Subpart I.

D.1.2 Particulate Matter (PM) [326 IAC 12] [40 CFR 60.90, Subpart I]

Pursuant to 326 IAC 12, (40 CFR Part 60.90, Subpart I) "Standards of Performance for Hot Mix Asphalt Facilities", the particulate matter emissions from the mixing and drying operations shall not exceed 0.04 grains per dry standard cubic foot (gr/dscf). This is equivalent to a particulate matter emission rate of 15.72 pounds per hour.

D.1.3 Opacity [326 IAC 12] [40 CFR 60.90, Subpart I]

Pursuant to 326 IAC 12, (40 CFR Part 60.92, Subpart I) "Standards of Performance for Hot Mix Asphalt Facilities", the mixing and drying operations shall not discharge or cause the discharge into the atmosphere any gases which exhibit 20 percent opacity or greater.

D.1.4 Particulate Matter Less Than 10 Microns (PM-10) [326 IAC 2-8-4]

Pursuant to 326 IAC 2-8-4, PM-10 emissions from the aggregate mixing and drying operation shall be limited to 0.09 pounds of PM-10 emitted per ton of asphalt produced, including both filterable and condensable fractions. Compliance with this limit shall limit the source's potential to emit of PM-10 to less than 100 tons per 365 day period, rolled on a daily basis. Therefore, the Part 70 rules (326 IAC 2-7) do not apply.

D.1.5 Sulfur Dioxide (SO₂) [326 IAC 7-1] [326 IAC 7-2-1]

Pursuant to 326 IAC 7-1.1 (Sulfur Dioxide Emission Limitations), sulfur dioxide emissions from the 118 million British thermal units per hour burner for the aggregate drum mix dryer shall be limited to 0.5 pound per MMBtu heat input when using distillate oils and 1.6 pound per MMBtu heat input when using residual oils. This is equivalent to the following maximum allowable sulfur contents of the following fuels: No. 1 distillate fuel oil (0.5%), No. 2 distillate fuel oil (0.5%), No. 4 residual oil (1.6%), No. 5 residual fuel oil (1.7%), No. 6 residual fuel oil (1.7%), and re-refined waste oil (1.5%).

Pursuant to 326 IAC 7-1.1-2, this sulfur dioxide limit applies at all times including periods of startup, shutdown, and malfunction. Pursuant to 326 IAC 7-2-1, compliance shall be demonstrated on a calendar month average.

D.1.6 Re-refined Waste Oil Usage and Equivalents [326 IAC 2-8]

Pursuant to 326 IAC 2-8-4(1), the following limits shall apply:

- (a) the input of re-refined waste oil, plus equivalent re-refined waste oil equivalents in the 118 MMBtu per hour burner for the aggregate dryer shall be limited to 1,273,470 gallons per 365 day period, rolled on a daily basis, so that SO₂ emissions are limited below 100 tons per year.
- (b) For purposes of determining compliance, the following shall apply:
 - (1) every million cubic feet (MMCF) of natural gas burned shall be equivalent to 4.1 gallons of re-refined waste oil based on SO₂ emissions, such that the total gallons of re-refined waste oil, plus equivalent re-refined waste equivalent input does not exceed the limit specified;
 - (2) every 1,000 gallons of butane gas burned shall be equivalent to 0.006 gallons of re-refined waste oil based on SO₂ emissions, such that the total gallons of re-refined waste oil, plus equivalent re-refined waste equivalent input does not exceed the limit specified;
 - (3) every 1,000 gallons of propane gas burned shall be equivalent to 0.007 gallons of re-refined waste oil based on SO₂ emissions, such that the total gallons of re-refined waste oil, plus equivalent re-refined waste equivalent input does not exceed the limit specified;
 - (4) every 1,000 gallons of No. 2 distillate fuel oil burned shall be equivalent to 523.1 gallons of re-refined waste oil based on SO₂ emissions, such that the total gallons of re-refined waste oil, plus equivalent re-refined waste equivalent input does not exceed the limit specified;
 - (5) every 1,000 gallons of No. 4 distillate fuel oil burned shall be equivalent to 470.4 gallons of re-refined waste oil based on SO₂ emissions, such that the total gallons of re-refined waste oil, plus equivalent re-refined waste equivalent input does not exceed the limit specified.

Therefore, the requirements of 326 IAC 2-7 will not apply.

D.1.7 Natural Gas Usage and Equivalents [326 IAC 2-8]

Pursuant to 326 IAC 2-8-4(1), the following limits shall apply:

- (a) the input of natural gas and natural gas equivalents in the 118 MMBtu per hour burner for the aggregate dryer shall be limited to 695.98 MMCF per 365 day period, rolled on a daily basis, so that NO_x emissions are limited below 100 tons per year.
- (b) For purposes of determining compliance, the following shall apply:
 - (1) every 1,000 gallons of re-refined waste oil burned shall be equivalent to 0.0679 MMCF of natural gas based on NO_x emissions, such that the total input of natural gas and natural gas equivalent input does not exceed the limit specified;
 - (2) every 1,000 gallons of butane gas burned shall be equivalent to 0.075 MMCF of natural gas based on NO_x emissions, such that the total input of natural gas and natural gas equivalent input does not exceed the limit specified;
 - (3) every 1,000 gallons of propane gas burned shall be equivalent to 0.068 MMCF of natural gas based on NO_x emissions, such that the total input of natural gas and natural gas equivalent input does not exceed the limit specified;

- (4) every 1,000 gallons of No. 2 distillate fuel oil burned shall be equivalent to 0.0857 MMCF of natural gas based on NOx emissions, such that the total input of natural gas and natural gas equivalent input does not exceed the limit specified;
- (5) every 1,000 gallons of No. 4 distillate fuel oil burned shall be equivalent to 0.1679 MMCF of natural gas based on NOx emissions, such that the total input of natural gas and natural gas equivalent input does not exceed the limit specified.

Therefore, the requirements of 326 IAC 2-7 will not apply.

D.1.8 Preventive Maintenance Plan [326 IAC 2-8-4(9)]

A Preventive Maintenance Plan, in accordance with Section B - Preventive Maintenance Plan, of this permit, is required for this facility and any control devices.

Compliance Determination Requirements

D.1.9 Testing Requirements [326 IAC 2-8-5(a)(1), (4)] [326 IAC 2-1.1-11]

During the period between 42 to 48 months after issuance of this permit, the Permittee shall perform the following to demonstrate compliance with Conditions D.1.2, D.1.3 and D.1.4 for the aggregate dryer/burner:

- (a) PM and PM-10 testing utilizing methods per 40 CFR Part 60 Appendix A, Method 5 for PM and methods, as approved by the Commissioner for PM-10. PM-10 includes filterable and condensable PM-10.
- (b) Opacity testing utilizing 40 CFR Part 60 Appendix A, Method 9, to demonstrate compliance with the opacity limitation of Condition D.1.3.

This test shall be repeated at least once every five (5) years from the date of this valid compliance demonstration. Testing shall be conducted in accordance with Section C- Performance Testing.

D.1.10 Particulate Matter (PM)

In order to comply with Conditions D.1.2, D.1.3 and D.1.4, the baghouse for PM and PM10 control shall be in operation at all times when the aggregate dryer and burner are in operation.

D.1.11 Sulfur Dioxide Emissions and Sulfur Content

Compliance with Condition D.1.5 shall be determined utilizing one of the following options.

- (a) Pursuant to 326 IAC 3-7-4, the Permittee shall demonstrate that the sulfur dioxide emissions do not exceed 0.5 pounds per million Btu heat input when firing No. 2 and No. 4 distillate fuel oil, and 1.6 pounds per million Btu heat input when firing re-refined waste oil:
 - (1) Providing vendor analysis of fuel delivered, if accompanied by a vendor certification; or
 - (2) Analyzing the oil sample to determine the sulfur content of the oil via the procedures in 40 CFR 60, Appendix A, Method 19.
 - (A) Oil samples may be collected from the fuel tank immediately after the fuel tank is filled and before any oil is combusted; and

- (B) If a partially empty fuel tank is refilled, a new sample and analysis would be required upon filling.
- (b) Compliance may also be determined by conducting a stack test for sulfur dioxide emissions from the 118 MMBtu per hour heater, using 40 CFR 60, Appendix A, Method 6 in accordance with the procedures in 326 IAC 3-6.

A determination of noncompliance pursuant to any of the methods specified in (a) or (b) above shall not be refuted by evidence of compliance pursuant to the other method.

D.1.12 Used Oil Requirements [329 IAC 13]

The waste oil burned in the aggregate dryer burner shall comply with the used oil requirements specified in 329 IAC 13 (Used Oil Management). Pursuant to 329 IAC 13-3-2 (Used Oil Specifications), used oil burned for energy recovery that is classified as off-specification used oil fuel shall comply with the provisions of 329 IAC 13-8 (Used Oil Burners Who Burn Off-specification Used Oil For Energy Recovery), including:

- (a) Receipt of an EPA identification number as outlined in 329 IAC 13-8-3 (Notification),
- (b) Compliance with the used oil storage requirements specified in 329 IAC 13-8-5 (Used Oil Storage), and
- (c) Maintaining records pursuant to 329 IAC 13-8-6 (Tracking).

The burning of mixtures of used oil and hazardous waste that is regulated under 329 IAC 3.1 is prohibited at this source.

Compliance Monitoring Requirements [326 IAC 2-8-4] [326 IAC 2-8-5(a)(1)]

D.1.13 Visible Emissions Notations

- (a) Visible emission notations of the mixing and drying operation stack exhaust shall be performed once per shift during normal daylight operations when exhausting to the atmosphere. A trained employee shall record whether emissions are normal or abnormal.
- (b) For processes operated continuously, "normal" means those conditions prevailing, or expected to prevail, eighty percent (80%) of the time the process is in operation, not counting startup or shut down time.
- (c) In the case of batch or discontinuous operations, readings shall be taken during that part of the operation that would normally be expected to cause the greatest emissions.
- (d) A trained employee is an employee who has worked at the plant at least one (1) month and has been trained in the appearance and characteristics of normal visible emissions for that specific process.
- (e) The Compliance Response Plan for this unit shall contain troubleshooting contingency and response steps for when an abnormal emission is observed. Failure to take response steps in accordance with Section C - Compliance Response Plan - Preparation, Implementation, Records, and Reports, shall be considered a violation of this permit.

D.1.14 Parametric Monitoring

The Permittee shall record the total static pressure drop across the baghouse used in controlling the mixing and drying operations, at least once per shift when the mixing and drying process is in operation. When for any one reading, the pressure drop across the baghouse is outside the normal range of 2.0 and 8.0 inches of water or a range established during the latest stack test, the Permittee shall take reasonable response steps in accordance with Section C - Compliance Response Plan - Preparation, Implementation, Records, and Reports. A pressure reading that is outside the above mentioned range is not a deviation from this permit. Failure to take response steps in accordance with Section C - Compliance Response Plan - Preparation, Implementation, Records, and Reports, shall be considered a violation of this permit.

The instrument used for determining the pressure shall comply with Section C - Pressure Gauge and Other Instrument Specifications, of this permit, shall be subject to approval by IDEM, OAQ, and shall be calibrated at least once every six (6) months.

D.1.15 Baghouse Inspections

An inspection shall be performed each calendar quarter of all bags controlling the batch aggregate mixing/drying operations when venting to the atmosphere. A baghouse inspection shall be performed within three months of redirecting vents to the atmosphere and every three months thereafter. Inspections are optional when venting indoors. All defective bags shall be replaced.

D.1.16 Cyclone Inspections

An inspection shall be performed each calendar quarter of all cyclones controlling the batch aggregate mixing/drying operations when venting to the atmosphere. A cyclone inspection shall be performed within three months of redirecting vents to the atmosphere and every three months thereafter. Inspections are optional when venting to the indoors.

D.1.17 Broken or Failed Bag Detection

In the event that bag failure has been observed:

- (a) For multi-compartment units, the affected compartments will be shut down immediately until the failed units have been repaired or replaced. Operations may continue only if there are no visible emissions or if the event qualifies as an emergency and the Permittee satisfies the emergency provisions of this permit (Section B- Emergency Provisions). Within eight (8) business hours of the determination of failure, response steps according to the timetable described in the Compliance Response Plan shall be initiated. For any failure with corresponding response steps and timetable not described in the Compliance Response Plan, response steps shall be devised within eight (8) business hours of discovery of the failure and shall include a timetable for completion. Failure to take response steps in accordance with Section C - Compliance Response Plan - Preparation, Implementation, Records, and Reports, shall be considered a violation of this permit.
- (b) For single compartment baghouses, failed units and the associated process will be shut down immediately until the failed units have been repaired or replaced. Operations may continue only if the event qualifies as an emergency and the Permittee satisfies the requirements of the emergency provisions of this permit (Section B - Emergency Provisions).

D.1.18 Cyclone Failure Detection

In the event that cyclone failure has been observed:

Failed units and the associated process will be shut down immediately until the failed units have been repaired or replaced. Operations may continue only if the event qualifies as an emergency and the Permittee satisfies the requirements of the emergency provisions of this permit (Section B - Emergency Provisions).

Record Keeping and Reporting Requirements [326 IAC 2-8-4(3)]

D.1.19 Record Keeping Requirements

- (a) To document compliance with Conditions D.1.5, D.1.6, D.1.7 and D.1.11, the Permittee shall maintain records in accordance with (1) through (7) below.
- (1) Calendar dates covered in the compliance determination period;
 - (2) Actual re-refined waste oil and re-refined waste oil equivalent usage per day since last compliance determination period and equivalent SO₂ emissions;
 - (3) Actual natural gas and natural gas equivalent usage per day since last compliance determination period and equivalent NO_x emissions;
 - (4) A certification, signed by the owner or operator, that the records of the fuel supplier certifications represent all of the fuel combusted during the period; and
- If the fuel supplier certification is used to demonstrate compliance the following, as a minimum, shall be maintained:
- (5) Fuel supplier certifications;
 - (6) The name of the fuel supplier; and
 - (7) A statement from the fuel supplier that certifies the sulfur content of the fuel oil.

The Permittee shall retain records of all recording/monitoring data and support information for a period of five (5) years, or longer if specified elsewhere in this permit, from the date of the monitoring sample, measurement, or report. Support information includes all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by this permit.

- (b) To document compliance with condition D.1.13, the Permittee shall maintain records of once per shift visible emission notations of the mixing and drying operation stack exhaust.
- (c) To document compliance with Condition D.1.14, the Permittee shall maintain the following:
- Once per shift records of the differential pressure during normal operation when venting to the atmosphere.
- (d) To document compliance with Conditions D.1.15 and D.1.16, the Permittee shall maintain records of the results of the inspections required under Conditions D.1.15 and D.1.16 and the dates the vents are redirected.
- (e) All records shall be maintained in accordance with Section C - General Record Keeping Requirements, of this permit.

D.1.20 Reporting Requirements

A monthly summary of the information to document compliance with Conditions D.1.6 and D.1.7 shall be submitted to the addresses listed in Section C - General Reporting Requirements, of this permit, using the reporting forms located at the end of this permit, or their equivalent, within thirty (30) days after the end of the quarter being reported. The report submitted by the Permittee does require the certification by the "authorized individual" as defined by 326 IAC 2-1-1(1).

SECTION D.2 FACILITY OPERATION CONDITIONS

cold-mix (stockpile mix) asphalt storage piles, containing cutback asphalt with 10 percent diesel-like solvent by volume.

Emissions Limitations and Standards [326 IAC 2-8-4(1)]

D.2.1 Cold-Mix (Stockpile Mix) VOC Usage [326 IAC 2-8-4]

Cutback asphalt with VOC solvent liquid binder used in the production of cold mix asphalt shall be limited to less than 57.52 tons of liquid binder per 365 day period, rolled on a daily basis. This is equivalent to limiting the VOC emitted from solvent use to less than 12.08 tons per 365 day period, rolled on a daily basis, based on the following definition:

Cutback asphalt with solvent - contains a maximum of 10 percent (%) of liquid binder by weight of VOC solvent and 21.0% by weight of the VOC solvent in the liquid blend evaporating. The percent oil distillate in cutback asphalt with solvent liquid, as determined by ASTM, shall be 7% or less of the total emulsion by volume.

Compliance Determination Requirements

D.2.2 VOC Emissions

Compliance with Condition D.2.2 shall be demonstrated within 30 days of the end of each quarter based on the VOC solvent cutback asphalt binder usage for the most recent 365 day period.

Record Keeping and Reporting Requirements [326 IAC 2-8-4(3)] [326 IAC 2-8-16]

D.2.3 Record Keeping Requirements

To document compliance with Condition D.2.2, the Permittee shall maintain records in accordance with (a) through (d) below. Records maintained for (a) through (d) shall be taken daily and shall be complete and sufficient to establish compliance with the VOC usage limits and/or the VOC emission limits established in Condition D.2.2.

- (a) Calendar dates covered in the compliance determination period;
- (b) Cutback asphalt binder usage per day since the last compliance determination period;
- (c) VOC solvent content by weight of the cutback asphalt binder used each day; and
- (d) Amount of VOC solvent used in the production of cold mix asphalt, and the amount of VOC emitted each day.

All records shall be maintained in accordance with Section C - General Record Keeping Requirements, of this permit.

D.2.4 Reporting Requirements

A monthly summary of the information to document compliance with Condition D.2.2 shall be submitted to the address listed in Section C - General Reporting Requirements, of this permit, using the reporting forms located at the end of this permit, or their equivalent, within thirty (30) days after the end of the quarter being reported. The report submitted by the Permittee does not require the certification by the "authorized individual" as defined by 326 IAC 2-1.1-1(1).

SECTION D.3

FACILITY OPERATION CONDITIONS

Facility Description [326 IAC 2-8-4(10)]:

The source also consists of the following insignificant activities, as defined in 326 IAC 2-7-1(21):

- (d) three (3) liquid asphalt storage tanks, identified as Tank 19A, constructed in 1975, and Tanks 19B and 19C, both constructed in 2001, with maximum storage capacities of 18,000, 25,000 and 25,000 gallons, respectively, with each tank exhausting at one (1) stack, identified as SV4, SV5, and SV6, respectively.

(The information describing the process contained in this facility description box is descriptive information and does not constitute enforceable conditions.)

Record Keeping and Reporting Requirement [326 IAC 2-8-4(3)] [326 IAC 2-8-16]

D.3.1 Record Keeping Requirements [326 IAC 12] [40 CFR 60.110b, Subpart Kb]

Pursuant to the New Source Performance Standard (NSPS), 326 IAC12 and 40 CFR Part 60.116 Subpart Kb, the Permittee shall maintain permanent accessible records at the source for the life of each volatile liquid storage tank as follows:

- (a) the dimension of each storage vessel (Tank 19B and Tank 19C);
- (b) an analysis showing the capacity of each storage vessel (Tank 19B and Tank 19C); and
- (c) the true vapor pressure of the VOC stored in the liquid asphalt storage tanks (Tank 19B and Tank 19C), to be less than 15.0 kPa.

This report is an affirmation that the source has met all the requirements stated in this permit. This report shall be submitted quarterly based on a calendar year. Any deviation from the requirements, the date(s) of each deviation, the probable cause of the deviation, and the response steps taken must be reported. Deviations that are required to be reported by an applicable requirement shall be reported according to the schedule stated in the applicable requirement and do not need to be included in this report. Additional pages may be attached if necessary. If no deviations occurred, please specify in the box marked "No deviations occurred this reporting period".

Indiana Department of Environmental Management Office of Air Quality

Addendum to the Technical Support Document (TSD) for a Federally Enforceable State Operating Permit (FESOP) Renewal

Source Name:	Rieth-Riley Construction Company, Inc.
Source Location:	361 West U.S. Highway 6, Valparaiso, Indiana 46383
SIC Code:	2951
County:	Porter
Operation Permit No.:	F127-14158-03224
Permit Reviewer:	Alic Bent /EVP

On February 13, 2002, the Office of Air Quality (OAQ) had a notice published in the Times, Munster, Indiana, stating that Rieth-Riley Construction Company, Inc had applied for a Federally Enforceable State Operating Permit (FESOP) Renewal for the operation of a hot mix asphalt plant. The notice also stated that OAQ proposed to issue a Federally Enforceable State Operating Permit Renewal for this operation and provided information on how the public could review the proposed FESOP Renewal and other documentation. Finally, the notice informed interested parties that there was a period of thirty (30) days to provide comments on whether or not this FESOP Renewal should be issued as proposed.

On March 15, 2002, Dean Logan, Rieth-Riley Construction Company submitted comments on the proposed FESOP. The summary of the comments and corresponding responses is as follows (bolded language has been added and the language with a line through it has been deleted):

Comment #1

Section D.1.9 Testing Requirements. We just did a stack test this past July. If we follow the condition in this permit we will test again within 3 years. Since we only have to test every 5 years, should the wording in the permit state to complete a stack test before July 2006?

Response #1

The following change has been made to D.1.9 Testing Requirements:

D.1.9 Testing Requirements [326 IAC 2-8-5(a)(1), (4)] [326 IAC 2-1.1-11]

During the period between ~~30 to 36~~ **42 to 48** months after issuance of this permit, the Permittee shall perform the following to demonstrate compliance with Conditions D.1.2 , D.1.3 and D.1.4 for the aggregate dryer/burner:

- (a) PM and PM-10 testing utilizing methods per 40 CFR Part 60 Appendix A, Method 5 for PM and methods, as approved by the Commissioner for PM-10. PM-10 includes filterable and condensable PM-10.
- (b) Opacity testing utilizing 40 CFR Part 60 Appendix A, Method 9, to demonstrate compliance with the opacity limitation of Condition D.1.3.

This test shall be repeated at least once every five (5) years from the date of this valid compliance demonstration. Testing shall be conducted in accordance with Section C-Performance Testing.

Comment #2

In Section D.1.6 Re-refined Waste Oil Usage and Equivalents. You omitted the equivalents for propane gas and butane gas.

Response #2

The equivalents for propane and butane gas have been added to D.1.6(b):

D.1.6 Re-refined Waste Oil Usage and Equivalents [326 IAC 2-8]

Pursuant to 326 IAC 2-8-4(1), the following limits shall apply:

- (a) the input of re-refined waste oil, plus equivalent re-refined waste oil equivalents in the 118 MMBtu per hour burner for the aggregate dryer shall be limited to 1,273,470 gallons per 365 day period, rolled on a daily basis, so that SO₂ emissions are limited below 100 tons per year.
- (b) For purposes of determining compliance, the following shall apply:
 - (1) every million cubic feet (MMCF) of natural gas burned shall be equivalent to 4.1 gallons of re-refined waste oil based on SO₂ emissions, such that the total gallons of re-refined waste oil, plus equivalent re-refined waste equivalent input does not exceed the limit specified;
 - (2) **every 1,000 gallons of butane gas burned shall be equivalent to 0.006 gallons of re-refined waste oil based on SO₂ emissions, such that the total gallons of re-refined waste oil, plus equivalent re-refined waste equivalent input does not exceed the limit specified;**
 - (3) **every 1,000 gallons of propane gas burned shall be equivalent to 0.007 gallons of re-refined waste oil based on SO₂ emissions, such that the total gallons of re-refined waste oil, plus equivalent re-refined waste equivalent input does not exceed the limit specified;**
 - (24) every 1,000 gallons of No. 2 distillate fuel oil burned shall be equivalent to 523.1 gallons of re-refined waste oil based on SO₂ emissions, such that the total gallons of re-refined waste oil, plus equivalent re-refined waste equivalent input does not exceed the limit specified;
 - (35) every 1,000 gallons of No. 4 distillate fuel oil burned shall be equivalent to 470.4 gallons of re-refined waste oil based on SO₂ emissions, such that the total gallons of re-refined waste oil, plus equivalent re-refined waste equivalent input does not exceed the limit specified.

Therefore, the requirements of 326 IAC 2-7 will not apply.

Indiana Department of Environmental Management Office of Air Quality

Technical Support Document (TSD) for a Federally Enforceable State Operating Permit (FESOP) Renewal

Source Background and Description

Source Name: Rieth-Riley Construction Company, Inc.
Source Location: 361 West U.S. Highway 6, Valparaiso, Indiana 46383
County: Porter
SIC Code: 2951
Operation Permit No.: F127-14158-03224
Permit Reviewer: Alic Bent/EVP

The Office of Air Quality (OAQ) has reviewed a FESOP renewal application from Rieth-Riley Construction Company, Inc. relating to the operation of a hot mix asphalt batch plant. Rieth-Riley Construction Company, Inc. was issued FESOP 127-5490-03224 on December 13, 1996.

Permitted Emission Units and Pollution Control Equipment

The source consists of the following permitted emission units and pollution control devices:

- (a) one (1) aggregate rotary drum dryer, identified as emission unit No. 2, constructed in 1975, with a maximum capacity of 400 tons per hour, equipped with one (1) re-refined waste oil fired aggregate dryer burner with a maximum rated capacity of 118 million (MM) British thermal units (Btu) per hour using natural gas, liquefied petroleum gas, No. 2 distillate fuel oil and No. 4 distillate fuel oil as back-up fuels, and a cyclone and baghouse in series for air pollution control, exhausting at one (1) stack, identified as SV1;
- (b) one (1) drag slat hot mix conveyor and three (3) feeder conveyors;
- (c) one (1) screen;
- (d) three (3) liquid asphalt storage tanks, identified as Tank 19A, constructed in 1975, and Tanks 19B and 19C, both constructed in 2001, with maximum storage capacities of 18,000, 25,000 and 25,000 gallons, respectively, with each tank exhausting at one (1) stack, identified as SV4, SV5, and SV6, respectively;
- (e) one (1) re-refined waste oil or No. 4 distillate fuel oil storage tank, identified as Tank 18, constructed in 1975, with a maximum storage capacity of 20,400 gallons, exhausting at one (1) stack identified as SV9;
- (f) one (1) No. 2 distillate fuel oil storage tank, identified as Tank 22, constructed in 1975, with a maximum storage capacity of 9,800 gallons, exhausting at one (1) stack, identified as SV10;
- (g) cold-mix (stockpile mix) asphalt storage piles, containing cutback asphalt with 10 percent diesel-like solvent by volume.

Unpermitted Emission Units and Pollution Control Equipment

There are no unpermitted facilities operating at this source during this review process.

Insignificant Activities

The source also consists of the following insignificant activities, as defined in 326 IAC 2-7-1(21):

- (a) one (1) No. 2 distillate fuel oil fired hot oil heater, identified as emission unit No. 20, rated at 2.0 MMBtu per hour using natural gas and butane as back-up fuels, exhausting at one (1) stack, identified as SV2;
- (b) one (1) No. 2 distillate fuel oil fired liquid asphalt storage tank heater, identified as emission unit No. 19A, rated at 0.5 MMBtu per hour using natural gas and butane as back-up fuels, exhausting at one (1) stack, identified as SV3;
- (c) one (1) tach tank, identified as Tank 23, with a maximum storage capacity of 13,800 gallons, exhausting at one (1) stack identified as SV8;
- (d) one (1) cold feed system consisting of six (6) compartments with a total aggregate holding capacity of 180 tons;
- (e) one (1) hot aggregate bucket elevator;
- (f) one (1) hot aggregate storage bin consisting of four (4) compartments;
- (g) one (1) aggregate weigh hopper and one (1) asphalt cement weigh hopper;
- (h) one (1) pug mill mixer with a maximum hot mix holding capacity of 10,000 pounds;
- (i) three (3) hot mix storage bins, each with a maximum storage capacity of 400 tons;
- (j) one (1) dust storage bin with a capacity of 200 barrels;
- (k) one (1) Reclaimed Asphalt Pavement (RAP) feed system;
- (l) aggregate storage piles, with a total maximum storage capacity of 100,600 tons;
- (m) a petroleum fuel, other than gasoline, dispensing facility, having a storage capacity of less than or equal to 10,500 gallons, and dispensing less than or equal to 230,000 gallons per month;
- (n) vessels storing lubricating oils, hydraulic oils, machining oils, and machining fluids; and
- (o) paved and unpaved roads and parking lots with public access.

Existing Approvals

- (a) FESOP 127-5490-03224, issued on December 13, 1996; and expiring on December 13, 2001, and
- (b) First Significant Permit Revision 127-13986-03224, issued on June 28, 2001.

All conditions from previous approvals were incorporated into this FESOP except the following:

FESOP 127-5490-03224, issued on December 13, 1996:

D.1.1 Particulate Matter

- State: Pursuant to 326 IAC 6-3 (Process Operations) and 326 IAC 2-2 (Prevention of Significant Deterioration), the particulate matter emissions from the mixing and drying operations shall not exceed 36.2 pounds per hour.
- Federal: Pursuant to 326 IAC 12, (40 CFR Part 60.90, Subpart I) "Standards of Performance for Hot Mix Asphalt Facilities", the particulate matter emissions from the mixing and drying operations shall be limited to 0.04 grains per dry standard cubic foot (gr/dscf).

Reason Not Incorporated: Condition D.1.1 retains the Federal limitation, but deletes the State limitation since the aggregate mixing and drying operations are not subject to the requirements of 326 IAC 6-3-2. This rule does not apply if the limitation is not consistent with applicable limitations in 326 IAC 6-1 or 326 IAC 12. Although the requirements of 326 IAC 6-1 are not applicable to this stationary source since it is not located in a specifically listed county, 326 IAC 12 (i.e., Subpart I) does apply. Since the PM limit established by Subpart I is less than the PM limit that would be established by 326 IAC 6-3-2 (see Appendix A, page 16 and 17 of 19), the limit pursuant to 326 IAC 6-3-2 does not apply.

Enforcement Issue

There are no enforcement actions pending.

Recommendation

The staff recommends to the Commissioner that the FESOP Renewal be approved. This recommendation is based on the following facts and conditions:

Unless otherwise stated, information used in this review was derived from the application and additional information submitted by the applicant.

An administratively complete FESOP Renewal application for the purposes of this review was received on March 12, 2001.

There was no notice of completeness letter mailed to the source.

Emission Calculations

See Appendix A (pages 1 through 19) of this document for detailed emissions calculations.

Unrestricted Potential Emissions

This table reflects the unrestricted potential emissions of the source, excluding the emission limits that were contained in the previous FESOP.

Pollutant	Unrestricted Potential Emissions (tons/yr)
PM	56,688.81
PM-10	8,175.59
SO ₂	552.96
VOC	7,372.23
CO	44.33
NO _x	175.01

Note: For the purpose of determining Title V applicability for particulates, PM-10, not PM, is the regulated pollutant in consideration.

HAP's	Unrestricted Potential Emissions (tons/yr)
Acetaldehyde	less than 10
Arsenic	less than 10
Benzene	less than 10
Beryllium	less than 10
Cadmium	less than 10
Chromium	less than 10
Ethylbenzene	less than 10
Formaldehyde	less than 10
Lead	less than 10
Manganese	less than 10
Mercury	less than 10
Nickel	less than 10
Quinone	less than 10
Toluene	less than 10
Total Polycyclic Organic Matter	less than 10
Xylene	less than 10
TOTAL HAPs	less than 25

- (a) The potential to emit (as defined in 326 IAC 2-1.1-1(16)) of PM-10, SO₂ and NO_x are each equal to or greater than 100 tons per year and the source is located in Porter County and have the potential to emit of VOC greater than 25 tons per year. Therefore, the source is subject to the provisions of 326 IAC 2-7.

Potential to Emit After Issuance

The source, issued a FESOP on December 13, 1996, has opted to remain a FESOP source, rather than apply for a Part 70 Operating Permit. The table below summarizes the potential to emit, reflecting all limits, of the emission units. Any control equipment is considered enforceable only after issuance of this Federally Enforceable State Operating Permit and only to the extent that the effect of the control equipment is made practically enforceable in the permit. Since the source has not constructed any new emission units, the source's potential to emit is based on the emission units included in the original FESOP 127-5490-03224; issued on December 13, 1996.

Process/emission unit	Potential to Emit After Issuance (tons/year)						
	PM	PM-10	SO ₂	VOC	CO	NO _x	HAPs
dryer and burner	< 44.09	41.20	93.6	12.92	29.25	97.5	10.07
cold mix storage	-	-	-	< 12.08	-	-	-
insignificant activities *	205.91	57.84	5.4	negl.	0.92	1.50	negl.
Total PTE After Issuance	< 250	99.0	99.0	< 25	30.17	99.0	10.07

* Insignificant activities include conveying/handling, unpaved roads, storage and hot oil heater.

Note: Limited PM/PM10 PTE levels reflect the permit limited PTE's rather than the controlled potential emissions.

County Attainment Status

The source is located in Porter County.

Pollutant	Status
PM-10	Attainment
SO ₂	Unclassifiable
NO ₂	Attainment
Ozone	Severe nonattainment
CO	Attainment
Lead	Attainment

- (a) Volatile organic compounds (VOC) are precursors for the formation of ozone. Therefore, VOC emissions are considered when evaluating the rule applicability relating to the ozone standards. Porter County has been designated as severe nonattainment for ozone.

Federal Rule Applicability

There are no new federal rules applicable to this source during this FESOP renewal review process. The applicability determination that follows is based on that conducted for original FESOP F127-5490-00323, issued on December 13, 1996.

- (a) The hot mix asphalt source is subject to the New Source Performance Standard, 326 IAC 12, (40 CFR Part 60.90 through 60.93, Subpart I) "Standards of Performance for Hot Mix Asphalt Facilities" because it meets the definition of a hot mix asphalt facility pursuant to the rule and it was constructed after June 11, 1973. This rule limits particulate matter emissions to 0.04 grains per dry standard cubic foot (gr/dscf) and also limits visible emissions to 20% opacity. This is equivalent to a particulate matter emission rate of 15.72 pounds per hour. The source will comply with this rule by using a cyclone and baghouse in series to limit particulate matter emissions to 0.04 gr/dscf (see Appendix A, page 17 of 19, for detailed calculations).

- (b) One (1) 18,000 gallon liquid asphalt storage tank (Tank 19A), the 20,000 gallon re-refined waste oil or No. 4 distillate fuel oil storage tank (Tank 18) and the 9,800 gallon No. 2 fuel oil storage tank (Tank 22), each installed in 1975, are not subject to the New Source Performance Standard, 326 IAC 12, (40 CFR Part 60.110b, Subpart Kb) "Standards of Performance for Volatile Organic Liquid Storage Vessels" because they were installed prior to July 23, 1984. The 18,000 gallon liquid asphalt storage tank (Tank 19A) is also not subject to the New Source Performance Standard, 326 IAC 12, (40 CFR Part 60.110, Subpart K) "Standards of Performance for Storage Vessels for Petroleum Liquids" since the tank have a storage capacity of less than 40,000 gallons.

The two (2) 25,000 gallon liquid storage tanks (Tank 19B and Tank 19C), installed in 2001, are subject to subpart Kb because the tanks have storage capacities of greater than 40 cubic meters (m^3) (10,567 gallons), but since the tanks capacities are between 75 m^3 (19,813 gallons) and 151 m^3 (39,890 gallons), pursuant to 40 CFR 60.110b(c), these tanks are exempt from all other provisions of this Subpart except 60.116b, which requires that permanent records be maintained showing dimensions and an analysis of the capacities of each tank and showing the true vapor pressure of the stored VOC, to be less than 15.0 kPa.

- (c) The asphalt plant is not subject to the New Source Performance Standard 326 IAC 12 (40CFR 60.670 through 60.676, Subpart OOO) "Standards of Performance for Nonmetallic Mineral Processing Plants" for recycled asphalt pavement (RAP) usage since the RAP is received onsite ready-to-use, and there is no crushing or grinding of the RAP prior to loading into the first storage silo/bin.
- (d) There are no National Emission Standards for Hazardous Air Pollutants (NESHAPs)(326 IAC 14 and 40 CFR Part 61, and 326 IAC 20 and 40 CFR Part 63) applicable to this source.

State Rule Applicability - Entire Source

There are no new state rules applicable to this source during this FESOP renewal review process. The applicability determination that follows is based on that conducted for original FESOP 127-5490-03224, issued on December 13, 1996.

326 IAC 2-2 (Prevention of Significant Deterioration)

This source is not subject to the requirements of this rule. This source was constructed prior to the rule applicability date of August 7, 1980, is not one of the 28 listed source categories and no major modifications were done, therefore, it is not subject to the requirements of the rule. Therefore, the requirements of 326 IAC 2-2 do not apply.

326 IAC 2-6 (Emission Reporting)

This source is located in Porter County which is one of the specifically listed counties, and its potential to emit VOC and NO_x is greater than 10 tons per year. The source is therefore subject to 326 IAC 2-6 (Emission Reporting). Pursuant to this rule, the owner/operator of the source must submit an emission statement for the source. The statement must be received in accordance with the compliance schedule specified in 326 IAC 2-6 and contain the minimum requirement as specified in 326 IAC 2-6-4. The submittal should cover the period defined in 326 IAC 2-6-2(8).

326 IAC 2-8-4 (FESOP)

Pursuant to 326 IAC 2-8-4, the following limits shall apply:

- (a) The input of re-refined waste oil, plus re-refined waste oil equivalents in the 118 MMBtu per hour burner for the aggregate dryer shall be limited to 1,273,470 gallons per 365 day period, rolled on a daily basis, so that SO₂ emissions are limited below 100 tons per year. For purposes of determining compliance, the following shall apply:
 - (1) every million cubic feet (MMCF) of natural gas burned shall be equivalent to 4.1 gallons of re-refined waste oil based on SO₂ emissions, such that the total gallons of re-refined waste oil, plus equivalent re-refined waste equivalent input does not exceed the limit specified;
 - (2) every 1,000 gallons of No. 2 distillate fuel oil burned shall be equivalent to 523.1 gallons of re-refined waste oil based on SO₂ emissions, such that the total gallons of re-refined waste oil, plus equivalent re-refined waste equivalent input does not exceed the limit specified;
 - (3) every 1,000 gallons of No. 4 distillate fuel oil burned shall be equivalent to 470.4 gallons of re-refined waste oil based on SO₂ emissions, such that the total gallons of re-refined waste oil, plus equivalent re-refined waste equivalent input does not exceed the limit specified.

Therefore, the requirements of 326 IAC 2-7 will not apply.

- (b) The input of natural gas and natural gas equivalents in the 118 MMBtu per hour burner for the aggregate dryer shall be limited to 695.98 MMCF per 365 day period, rolled on a daily basis, so that NO_x emissions are limited below 100 tons per year. For purposes of determining compliance, the following shall apply:
 - (1) every 1,000 gallons of re-refined waste oil burned shall be equivalent to 0.0679 MMCF of natural gas based on NO_x emissions, such that the total input of natural gas and natural gas equivalent input does not exceed the limit specified;
 - (2) every 1,000 gallons of butane gas burned shall be equivalent to 0.075 MMCF of natural gas based on NO_x emissions, such that the total input of natural gas and natural gas equivalent input does not exceed the limit specified;
 - (3) every 1,000 gallons of propane gas burned shall be equivalent to 0.068 MMCF of natural gas based on NO_x emissions, such that the total input of natural gas and natural gas equivalent input does not exceed the limit specified;
 - (4) every 1,000 gallons of No. 2 distillate fuel oil burned shall be equivalent to 0.0857 MMCF of natural gas based on NO_x emissions, such that the total input of natural gas and natural gas equivalent input does not exceed the limit specified;
 - (5) every 1,000 gallons of No. 4 distillate fuel oil burned shall be equivalent to 0.1679 MMCF of natural gas based on NO_x emissions, such that the total input of natural gas and natural gas equivalent input does not exceed the limit specified.

Therefore, the requirements of 326 IAC 2-7 will not apply.

- (c) PM-10 emissions from the aggregate mixing and drying operation shall be limited to 0.09 pounds of PM-10 emitted per ton of asphalt produced. The source will comply with the PM-10 emission limit by utilizing a baghouse and a cyclone for controlling PM-10 emissions from the aggregate dryer to less than 0.09 pounds per ton of asphalt produced. Compliance with this limit shall limit the source's potential to emit of PM-10 to less than 100 tons per twelve (12) consecutive month period. Therefore, the requirements of 326 IAC 2-7 do not apply.
- (d) Cutback asphalt with VOC solvent liquid binder used in the production of cold mix asphalt shall be limited to less than 57.52 tons of VOC solvent per 365 day period, rolled on a daily basis. This is equivalent to limiting the VOC emitted from solvent use to less than 12.08 tons per 12 consecutive month period, based on the following definition:

Cutback asphalt with solvent - contains a maximum of 10 percent (%) of liquid binder by weight of VOC solvent and 21.0% by weight of the VOC solvent in the liquid blend evaporating. The percent oil distillate in cutback asphalt with solvent liquid, as determined by ASTM, shall be 7% or less of the total emulsion by volume.

Compliance with this condition will limit source-wide VOC to less than 25 tons per 365 day period, rolled on a daily basis. Therefore, the requirements of 326 IAC 2-7 (Part 70) are not applicable.

- (e) PM-10 emissions from the aggregate dryer shall not exceed 10.11 pounds per hour. The source will comply with the PM-10 emission limit by utilizing a baghouse for controlling PM-10 emissions from the aggregate dryer to less than 10.11 pounds per hour.

Therefore, the requirements of 326 IAC 2-7 do not apply.

326 IAC 5-1 (Opacity Limitations)

Pursuant to 326 IAC 5-1-2 (Opacity Limitations), except as provided in 326 IAC 5-1-3 (Temporary Alternative Opacity Limitations), opacity shall meet the following, unless otherwise stated in this permit:

- (a) Opacity shall not exceed an average of forty percent (40%) any one (1) six (6) minute averaging period as determined in 326 IAC 5-1-4.
- (b) Opacity shall not exceed sixty percent (60%) for more than a cumulative total of fifteen (15) minutes (sixty (60) readings as measured according to 40 CFR 60, Appendix A, Method 9 or fifteen (15) one (1) minute nonoverlapping integrated averages for a continuous opacity monitor) in a six (6) hour period.

326 IAC 6-4 (Fugitive Dust Emissions)

The Permittee shall not allow fugitive dust to escape beyond the property line or boundaries of the property, right-of-way, or easement on which the source is located, in a manner that would violate 326 IAC 6-4 (Fugitive Dust Emissions).

326 IAC 6-5 (Fugitive Particulate Matter Emission Limitations)

This source is not subject to 326 IAC 6-5, for fugitive particulate matter emissions because it is not located in a nonattainment area for particulate matter and it was constructed prior to December 13, 1985. Therefore, the requirements of 326 IAC 6-5 do not apply.

State Rule Applicability - Individual Facilities

There are no new state rules applicable to this source during this FESOP renewal review process. The applicability determination that follows is based on that conducted for original FESOP F127-5490-03224, issued on December 13, 1996.

326 IAC 6-3-2 (Process Operations)

The aggregate mixing and drying operation is not subject to the requirements of 326 IAC 6-3-2. This rule does not apply if the limitation established in the rule is not consistent with applicable limitations in 326 IAC 6-1 or 326 IAC 12. Since the applicable PM emission limit established by 326 IAC 12, 40 CFR 60, Subpart I (15.72 pounds per hour), is less than the PM limit that would be established by 326 IAC 6-3-2 (66.3 pounds per hour, (see Appendix A page 16 and 17 of 19, for details), the more stringent limit applies and the limit pursuant to 326 IAC 6-3-2 does not apply.

326 IAC 7-1.1 (Sulfur Dioxide Emission Limitations)

The aggregate mix dryer is subject to 326 IAC 7-1.1 because it has potential SO₂ emissions of greater than 25 tons per year (limited potential emissions are 93.6 tons per year). Pursuant to this rule, sulfur dioxide emissions from the dryer burner shall be limited to 1.6 pounds per MMBtu heat input for residual oils, and shall be limited to 0.5 pounds per MMBtu for distillate oil combustion. This is equivalent to the following maximum allowable sulfur contents of the following fuels: No. 2 distillate fuel oil (0.5%), No. 4 distillate oil (0.5%), and re-refined waste oil (1.5%). All fuels used by the dryer are in compliance with the aforementioned sulfur content limits (See Appendix A, Page 16 of 19 for detailed calculations).

326 IAC 7-2-1 (Sulfur Dioxide Reporting Requirements)

Pursuant to this rule, the source shall submit reports of calendar month average sulfur content, heat content, fuel consumption, and sulfur dioxide emission rate (pounds SO₂ per MMBtu), to the OAQ upon request.

326 IAC 8-5-2 (Miscellaneous Operations: Asphalt Paving)

The source is not subject to this rule. This rule applies to all asphalt paving application made after January 1, 1980. This source pre-dates this rule, therefore, 326 IAC 8-5-2 (Miscellaneous Operations: Asphalt Paving) does not apply.

326 IAC 8-4-3 (Petroleum Liquid Storage Facilities)

The 18,000 liquid asphalt storage tank (Tank 19A), the two (2) 25,000 gallon liquid asphalt storage tanks (Tanks 19B and 19C), and the 13,800 gallon tach tank are not subject to 326 IAC 8-4-3 because each tank has a storage capacity less than 39,000 gallons and contain volatile organic compounds whose true vapor pressure is less than 10.5 kPa.

326 IAC 8-7 (Specific VOC Reduction Requirements for Lake, Porter, Clark and Floyd Counties)

The requirements of this rule apply to stationary sources located in Lake, Porter, Clark and Floyd Counties that emit or have the potential to emit VOCs at levels equal to or greater than 25 tons per year in Lake and Porter Counties; 100 tons per year in Clark and Floyd Counties; and to any coating facility that emits or has the potential to emit 10 tons per year or greater in Lake, Porter, Clark or Floyd County. This source is located in Porter County. The source has limited potential to emit VOC to less than 25 tons per year. Therefore, this rule does not apply.

326 IAC 8-9 (Volatile Organic Liquid Storage Vessels)

Pursuant to 326 IAC 8-9-1, on and after October 1, 1995 stationary vessels used to store volatile organic liquids (VOL) must comply with the requirement of the rule if located in Clark, Floyd, Lake or Porter Counties. Stationary vessels with capacities less than 39,000 gallons are only subject to the reporting and record keeping requirements of the rule. Stationary storage vessels subject to any provision of 40 CFR Part 60.110b, New Source Performance Standard for Volatile Organic Liquid Storage, are exempt from this rule. The 18,000 liquid asphalt storage tank (Tank 19A), the two (2) 25,000 gallon liquid asphalt storage tanks (Tanks 19B and 19C), are not subject to IAC 8-9 because they are subject to the provision of 40 CFR Part 60.110b, Subpart Kb New Source Performance Standard for Volatile Organic Liquid Storage.

Testing Requirements

All testing requirements from previous approvals were incorporated into this FESOP. This source is subject to 40 CFR 60, Subpart I (Standards of Performance for Hot Mix Asphalt Facilities), and shall comply with the particulate matter (PM) and opacity compliance testing requirements of the rule for the batch-mix plant. OAQ has also required PM-10 testing to demonstrate FESOP compliance.

Previous stack tests to comply with this requirement were conducted as follows:

- (a) PM and PM-10, and opacity testing was performed August 27, 1996.

A new opacity testing requirement has been incorporated into the existing testing condition (previously D.1.6, now re-numbered as D.1.10) of this FESOP, and the condition has been re-written for greater clarity as follows (new language in bold and stricken language with a line through it):

D.1.69 Particulate Matter Testing Requirements [326 IAC 2-8-5(a)(1), (4)] [326 IAC 2-1.1-11]

~~During the period between 30 to 36 months after issuance of this permit August, 2001, which was five years after the last OAM approved stack test was completed on August 27, 1996,~~
the Permittee shall perform the following to demonstrate compliance with Conditions D.1.2, D.1.3 and D.1.4 for the batch-mix aggregate dryer:

- (a) PM and PM-10 testing utilizing methods per 40 CFR Part 60 Appendix A, Method 5 **for PM and methods** ~~, 17, 40 CFR Part 51 Appendix M, Method 201, 201a, 202,~~ as approved by the Commissioner **for PM-10**. ~~This test shall be repeated at least once every five (5) years, from the date of this valid compliance demonstration.~~ PM-10 includes filterable and condensable PM-10.
- (b) **Opacity testing utilizing 40 CFR Part 60 Appendix A, Method 9, to demonstrate compliance with the opacity limitation of Condition D.1.3.**

This test shall be repeated at least once every five (5) years from the date of this valid compliance demonstration. Testing shall be conducted in accordance with Section C-Performance Testing.

Justification for new testing requirement: The source is subject to the NSPS requirements of 40 CFR 60, Subpart I (Standards of Performance for Hot Mix Asphalt Facilities). As an affected source, compliance testing for opacity is required pursuant to the NSPS, but was not included in the testing condition original FESOP, even though an opacity test was performed in August 1996. This change completes the NSPS testing requirement.

Compliance Requirements

Permits issued under 326 IAC 2-8 are required to ensure that sources can demonstrate compliance with applicable state and federal rules on a more or less continuous basis. All state and federal rules contain compliance provisions, however, these provisions do not always fulfill the requirement for a more or less continuous demonstration. When this occurs IDEM, OAQ, in conjunction with the source, must develop specific conditions to satisfy 326 IAC 2-8-4. As a result, compliance requirements are divided into two sections: Compliance Determination Requirements and Compliance Monitoring Requirements.

Compliance Determination Requirements in Section D of the permit are those conditions that are found more or less directly within state and federal rules and the violation of which serves as grounds for enforcement action. If these conditions are not sufficient to demonstrate continuous compliance, they will be supplemented with Compliance Monitoring Requirements, also Section D of the permit. Unlike Compliance Determination Requirements, failure to meet Compliance Monitoring conditions would serve as a trigger for corrective actions and not grounds for enforcement action. However, a violation in relation to a compliance monitoring condition will arise through a source's failure to take the appropriate corrective actions within a specific time period.

All compliance requirements from previous approvals were incorporated into this FESOP, except the frequencies for visible emission notations and baghouse pressure drop readings have been changed to once per shift.

Reason changed: Compliance monitoring conditions are in the permit in order to ensure continuous compliance with the requirements. Baghouse failure can occur suddenly; therefore monitoring of baghouse operational parameters should be more frequent than weekly or even daily in such cases where a source operates more than one shift per day. The OAQ believes that changing visible emissions notations to once per operating shift is a reasonable requirement. Therefore, the requirements to perform visible emissions notations have been changed from weekly to once per shift. This change likewise applies to the pressure drop readings. The compliance monitoring requirements applicable to this source are as follows:

1. The mixing and drying operation has applicable compliance monitoring conditions as specified below:
 - (a) Visible emissions notations of the drum-mix aggregate dryer/burner baghouse stack exhaust, shall be performed once per shift during normal daylight operations when exhausting to the atmosphere. A trained employee will record whether emissions are normal or abnormal.

- (b) The Permittee shall record the total static pressure drop across the baghouse controlling the drum-mix aggregate dryer, at least once per shift when the respective aggregate dryer is in operation and venting to the atmosphere. When for any one reading, the pressure drop across the baghouse is outside the normal range of 2.0 and 8.0 inches of water or a range established during the latest stack test, the Permittee shall take reasonable response steps in accordance with Section C - Compliance Response Plan - Failure to Take Response Steps.
- (c) An inspection shall be performed each calendar quarter of all bags and cyclone controlling the aggregate drying/burner when venting to the atmosphere. A baghouse inspection shall be performed within three months of redirecting vents to the atmosphere and every three months thereafter. Inspections are optional when venting indoors. All defective bags shall be replaced.
- (d) In the event that bag failure has been observed:
 - (1) For multi-compartment units, the affected compartments will be shut down immediately until the failed units have been repaired or replaced. Operations may continue only if there are no visible emissions or if the event qualifies as an emergency and the Permittee satisfies the emergency provisions of this permit (Section B- Emergency Provisions). Within eight (8) business hours of the determination of failure, response steps according to the timetable described in the Compliance Response Plan shall be initiated. For any failure with corresponding response steps and timetable not described in the Compliance Response Plan, response steps shall be devised within eight (8) business hours of discovery of the failure and shall include a timetable for completion. Failure to take response steps in accordance with Section C - Compliance Monitoring Plan - Failure to Take Response Steps, shall be considered a violation of this permit.
 - (2) For single compartment baghouses and the cyclone, failed units and the associated process will be shut down immediately until the failed units have been repaired or replaced. Operations may continue only if the event qualifies as an emergency and the Permittee satisfies the requirements of the emergency provisions of this permit (Section B - Emergency Provisions).

These monitoring conditions are necessary because the baghouses and the cyclone for the aggregate mixing and drying process must operate properly to ensure compliance with 326 IAC 12, 40 CFR 60.90, Subpart I (Standards of Performance for Hot Mix Asphalt Facilities) and 326 IAC 2-8 (FESOP).

Conclusion

The operation of this hot mix asphalt batch plant shall be subject to the conditions of the attached proposed FESOP Renewal No.: F127-14158-03224.

Company Name:

Rieth-Riley Construction

Plant Location:

361 West US Highway 6, Valparaiso, IN 46383

County:

Porter

**** aggregate dryer burner****

The following calculations determine the amount of emissions created by re-refined waste oil

@ 1.0 % sulfur, 1.0 % ash, based on 8760 hours of use and
US EPA's AP-42, 5th Edition, Section 1.11 - Waste Oil Combustion, Tables 1.11-1, 1.11-2, and 1.11-3.

Criteria Pollutant:	118 MMBtu/hr * 8760 hr/yr	* Ef (lb/1000 gal) = (ton/yr)
	140,000 Btu/gal * 2000 lb/ton	

P M:	64.0 lb/1000 gal =	236.27 ton/yr
P M-10:	51.0 lb/1000 gal =	188.28 ton/yr
S O 2:	147.0 lb/1000 gal =	542.68 ton/yr
N O x:	19.0 lb/1000 gal =	70.14 ton/yr
V O C:	1.0 lb/1000 gal =	3.69 ton/yr
C O:	5.0 lb/1000 gal =	18.46 ton/yr

The following calculations determine the amount of emissions created by natural gas combustion, from the aggregate dryer burner, based on 8,760 hours of operation and US EPA's AP-42, 5th Edition, Section 1.4 - Natural Gas Combustion, Tables 1.4-1 and 1.4-2.

Criteria Pollutant:	118 MMBtu/hr * 8,760 hr/yr	* Ef (lb/MMcf) = (ton/yr)
	1000 Btu/cf * 2,000 lb/ton	

P M:	1.9 lb/MMcf =	0.98 ton/yr
P M-10:	7.6 lb/MMcf =	3.93 ton/yr
S O 2:	0.6 lb/MMcf =	0.31 ton/yr
N O x:	280.0 lb/MMcf =	144.72 ton/yr
V O C:	5.5 lb/MMcf =	2.84 ton/yr
C O:	84.0 lb/MMcf =	43.41 ton/yr

The following calculations determine the amount of emissions created by the combustion of liquified petroleum gas

@ 0.0 % sulfur, from the aggregate dryer, based on 8,760 hours of use and US EPA's AP-42, 5th Edition, Section 1.5 - Liquified Petroleum Gas Combustion, Table 1.5-1.

Criteria Pollutant:	118 MMBtu/hr * 8,760 hr/yr	* Ef (lb/1,000 gal) = (ton/yr)
	91,500 Btu/gal * 2,000 lb/ton	

P M:	0.6 lb/1000 gal =	3.39 ton/yr
P M-10:	0.6 lb/1000 gal =	3.39 ton/yr
S O 2:	9.0E-04 lb/1000 gal =	5.1E-03 ton/yr
N O x:	21.0 lb/1000 gal =	118.62 ton/yr
V O C:	0.60 lb/1000 gal =	3.39 ton/yr
C O:	3.6 lb/1000 gal =	20.33 ton/yr

The following calculations determine the amount of emissions created by the combustion of #2 distillate fuel oil
@ 0.5 % sulfur, from the aggregate dryer burner, based on 8,760 hours of use and
US EPA's AP-42, 5th Edition, Section 1.3 - Fuel Oil Combustion, Tables 1.3-2, 1.3-4, and 1.3-7.

Criteria Pollutant:	118 MMBtu/hr * 8,760 hr/yr	* Ef (lb/1,000 gal) = (ton/yr)
	140,000 Btu/gal * 2,000 lb/ton	
P M:	2.0 lb/1000 gal =	7.38 ton/yr
P M-10:	1.0 lb/1000 gal =	3.69 ton/yr
S O 2:	76.9 lb/1000 gal =	283.89 ton/yr
N O x:	24.0 lb/1000 gal =	88.60 ton/yr
V O C:	0.20 lb/1000 gal =	0.74 ton/yr
C O:	5.0 lb/1000 gal =	18.46 ton/yr

The following calculations determine the amount of emissions created by the combustion of #4 distillate fuel oil
@ 0.5 % sulfur, from the aggregate dryer burner, based on 8,760 hours of use and
US EPA's AP-42, 5th Edition, Section 1.3 - Fuel Oil Combustion, Tables 1.3-1, 1.3-2, and 1.3-3.

Criteria Pollutant:	118 MMBtu/hr * 8,760 hr/yr	* Ef (lb/1,000 gal) = (ton/yr)
	140,000 Btu/gal * 2,000 lb/ton	
P M:	7.0 lb/1000 gal =	25.84 ton/yr
P M-10:	6.0 lb/1000 gal =	22.22 ton/yr
S O 2:	69.2 lb/1000 gal =	255.28 ton/yr
N O x:	47.0 lb/1000 gal =	173.51 ton/yr
V O C:	0.20 lb/1000 gal =	0.74 ton/yr
C O:	5.0 lb/1000 gal =	18.46 ton/yr

The maximum potential emissions from the aggregate dryer burner due to fuel combustion are the following:

Criteria Pollutant:		Worst Case Fuel
P M:	236.27 ton/yr	Re-refined Waste Oil
P M-10:	188.28 ton/yr	Re-refined Waste Oil
S O 2:	542.68 ton/yr	Re-refined Waste Oil
N O x:	173.51 ton/yr	# 4 fuel oil
V O C:	3.69 ton/yr	Re-refined Waste Oil
C O:	43.41 ton/yr	Natural Gas

**** miscellaneous combustion sources****

This source possesses a 2.0 MMBtu/hr hot oil heater which can combust either re-refined waste oil, natural gas, or butane. Butane emissions are trivial and are not included here.

The following calculations determine the amount of emissions created by re-refined waste oil

@ 1.0 % sulfur, 1.0 % ash, based on 8760 hours of use and
US EPA's AP-42, 5th Edition, Section 1.11 - Waste Oil Combustion, Tables 1.11-1, 1.11-2, and 1.11-3.

Criteria Pollutant:	2.0 MMBtu/hr * 8760 hr/yr 140,000 Btu/gal * 2000 lb/ton	* Ef (lb/1000 gal) = (ton/yr)
P M:	64.0 lb/1000 gal =	4.00 ton/yr
P M-10:	51.0 lb/1000 gal =	3.19 ton/yr
S O 2:	147.0 lb/1000 gal =	9.20 ton/yr
N O x:	19.0 lb/1000 gal =	1.19 ton/yr
V O C:	1.0 lb/1000 gal =	0.06 ton/yr
C O:	5.0 lb/1000 gal =	0.31 ton/yr

The following calculations determine the amount of emissions created by natural gas combustion based on 8,760 hours of operation and US EPA's AP-42, 5th Edition, Section 1.4 - Natural Gas Combustion, Tables 1.4-1, 1.4-2, and 1.4-3.

Criteria Pollutant:	2.0 MMBtu/hr * 8,760 hr/yr 1000 Btu/cf * 2,000 lb/ton	* Ef (lb/MMcf) = (ton/yr)
P M:	1.90 lb/MMcf =	0.02 ton/yr
P M-10:	7.60 lb/MMcf =	0.07 ton/yr
S O 2:	0.6 lb/MMcf =	0.01 ton/yr
N O x:	100.0 lb/MMcf =	0.88 ton/yr
V O C:	5.5 lb/MMcf =	0.05 ton/yr
C O:	84.0 lb/MMcf =	0.74 ton/yr

This source possesses a 0.5 MMBtu/hr storage tank heater which can combust No. 2 distillate fuel oil, natural gas or butane.

The following calculations determine the amount of emissions created by the combustion of #2 distillate fuel oil

@ 0.5 % sulfur, based on 8,760 hours of use and US EPA's AP-42,
5th Edition, Section 1.3 - Fuel Oil Combustion, Tables 1.3-2, 1.3-4, and 1.3-8.

Criteria Pollutant:	0.5 MMBtu/hr * 8,760 hr/yr 140,000 Btu/gal * 2,000 lb/ton	* Ef (lb/1,000 gal) = (ton/yr)
P M:	2.0 lb/1000 gal =	0.03 ton/yr
P M-10:	1.1 lb/1000 gal =	0.02 ton/yr
S O 2:	69.0 lb/1000 gal =	1.08 ton/yr
N O x:	20.0 lb/1000 gal =	0.31 ton/yr
V O C:	0.20 lb/1000 gal =	3.13E-03 ton/yr
C O:	5.0 lb/1000 gal =	0.08 ton/yr

The following calculations determine the amount of emissions created by natural gas combustion based on 8,760 hours of operation and US EPA's AP-42, 5th Edition, Section 1.4 - Natural Gas Combustion, Tables 1.4-1, 1.4-2, and 1.4-3.

Criteria Pollutant:	$\frac{0.5 \text{ MMBtu/hr} \times 8,760 \text{ hr/yr}}{1000 \text{ Btu/cf} \times 2,000 \text{ lb/ton}}$	* Ef (lb/MMcf) = (ton/yr)
P M:	1.90 lb/MMcf =	0.00 ton/yr
P M-10:	7.60 lb/MMcf =	0.02 ton/yr
S O 2:	0.6 lb/MMcf =	0.00 ton/yr
N O x:	100.0 lb/MMcf =	0.22 ton/yr
V O C:	5.5 lb/MMcf =	0.01 ton/yr
C O:	84.0 lb/MMcf =	0.18 ton/yr

**** miscellaneous combustion sources****

The maximum potential emissions of the miscellaneous combustion sources are the following:

Criteria Pollutant:		Worst Case Fuel (for hot oil heater)
P M:	4.04 ton/yr	Re-refined Waste Oil
P M-10:	3.21 ton/yr	Re-refined Waste Oil
S O 2:	10.28 ton/yr	Re-refined Waste Oil
N O x:	1.50 ton/yr	Re-refined Waste Oil
V O C:	0.07 ton/yr	Re-refined Waste Oil
C O:	0.92 ton/yr	Natural gas

**** aggregate drying: batch-mix plant ****

The following calculations determine the amount of worst case emissions created by aggregate drying before controls, based on 8,760 hours of use and USEPA's AP-42, 5th Edition, Section 11.1 - Hot Mix Asphalt Plants, Tables 11.1-2 and 11.1-9 for a batch mix dryer which has the capability of combusting either fuel oil or natural gas:

Pollutant:	Ef	lb/ton x	$\frac{400}{2,000}$	ton/hr x	8,760 hr/yr
			lb/ton	lb/ton	
Criteria Pollutant:					
P M:	32	lb/ton =		56,064.00 ton/yr	
P M-10:	4.5	lb/ton =		7,884.00 ton/yr	
VOC:	5.75E-03	lb/ton =		10.07 ton/yr	

The VOC emission factor represents the sum of the HAP emission factors from the dryer which were assumed to be VOC.

**** conveying / handling ****

The following calculations determine the amount of emissions created by wet (>1.5% moisture) material handling, based on 8,760 hours of use and AP-42, Section 11.19.2, Table 11.19.2-2. Emission factors for process operations are as follows:

PM-10 Emissions Per Operation:

$$\frac{400 \text{ ton/hr} \times 8,760 \text{ hrs/yr} \times E_f \text{ (lb/ton of material)}}{2,000 \text{ lb/ton}} = (\text{ton/yr})$$

$$E = k \cdot (0.0032)^{((U/5)^{1.3}) / ((M/2)^{1.4})}$$

$$= 5.23\text{E-}03 \text{ lb PM-10/ton}$$

$$1.11\text{E-}02 \text{ lb PM/ton}$$

where k = 0.35 (particle size multiplier for <10um)
0.74 (particle size multiplier for <30um)

U = 12 mph mean wind speed

M = 1.5 material moisture content (%)

Total PM 10 Emissions: 9.16 tons/yr
Total PM Emissions: 19.37 tons/yr

**** unpaved roads ****

The following calculations determine the amount of emissions created by vehicle traffic on unpaved roads, based on 8,760 hours of use and AP-42, Ch 13.2.2.2

I. Triaxle Trucks

$$9.5 \text{ trip/hr} \times 0.141 \text{ mile/trip} \times 2 \text{ (round trip)} \times 8,760 \text{ hr/yr} = 23,468 \text{ mile/yr}$$

$$E_f = k \cdot [(s/12)^a \cdot (W/3)^b] / [(M_{dry}/0.2)^c \cdot ((365-p)/365)] \cdot (S/15)$$

$$= 5.57 \text{ lb PM/mile}$$

$$= 1.45 \text{ lb PM-10/mile}$$

where k = 10 (particle size multiplier, PM30) (k= 2.6 for PM10)

s = 4.8 mean % silt content of unpaved plant roads

a = 0.8 Constant for PM30/PM-10

W = 21 tons, average vehicle weight

b = 0.5 Constant for PM30 (b = 0.4 for PM10)

Mdry = 0.2 surface material moisture content, % (default 0.2 (dry conditions) when using rainfall parameter)

c = 0.4 Constant for PM30 (c = 0.3 for PM10)

p = 125 number of days with at least 0.01 in of precipitation per year

S = 10 mph speed limit

$$\text{PM} = \frac{5.57 \text{ lb/mi} \times 23,468 \text{ mi/yr}}{2000 \text{ lb/ton}} = 65.38 \text{ tons/yr}$$

$$\text{PM-10} = \frac{1.45 \text{ lb/mi} \times 23,468 \text{ mi/yr}}{2000 \text{ lb/ton}} = 17.00 \text{ tons/yr}$$

**** unpaved roads ****

II. Semi-Dump Trucks

$$6.79 \text{ trip/hr} \times 0.141 \text{ mile/trip} \times 2 \text{ (round trip)} \times 8,760 \text{ hr/yr} = 16,773 \text{ mile/yr}$$

$$E_f = k \cdot [(s/12)^a] \cdot [(W/3)^b] / [(M_{dry}/0.2)^c \cdot ((365-p)/365)] \cdot (S/15)$$

$$= 6.43 \text{ lb PM/mile}$$

$$= 1.67 \text{ lb PM-10/mile}$$

where k = 10 (particle size multiplier, PM30) (k= 2.6 for PM10)

s = 4.8 mean % silt content of unpaved plant roads

a = 0.8 Constant for PM30/PM-10

W = 28 tons, average vehicle weight

b = 0.5 Constant for PM30 (b = 0.4 for PM10)

Mdry = 0.2 surface material moisture content, % (default 0.2 (dry conditions) when using rainfall parameter)

c = 0.4 Constant for PM30 (c = 0.3 for PM10)

p = 125 number of days with at least 0.01 in of precipitation per year

S = 10 mph speed limit

$$PM = \frac{6.43 \text{ lb/mi} \times 16,773 \text{ mi/yr}}{2000 \text{ lb/ton}} = 53.96 \text{ tons/yr}$$

$$PM-10 = \frac{1.67 \text{ lb/mi} \times 16,773 \text{ mi/yr}}{2000 \text{ lb/ton}} = 14.03 \text{ tons/yr}$$

III. Single Axle Trucks

$$8 \text{ trip/hr} \times 0.083 \text{ mile/trip} \times 2 \text{ (round trip)} \times 8,760 \text{ hr/yr} = 11,633 \text{ mile/yr}$$

$$E_f = k \cdot [(s/12)^a] \cdot [(W/3)^b] / [(M_{dry}/0.2)^c \cdot ((365-p)/365)] \cdot (S/15)$$

$$= 4.03 \text{ lb PM/mile}$$

$$= 1.05 \text{ lb PM-10/mile}$$

where k = 10 (particle size multiplier, PM30) (k= 2.6 for PM10)

s = 4.8 mean % silt content of unpaved plant roads

a = 0.8 Constant for PM30/PM-10

W = 11 tons, average vehicle weight

b = 0.5 Constant for PM30 (b = 0.4 for PM10)

Mdry = 0.2 surface material moisture content, % (default 0.2 (dry conditions) when using rainfall parameter)

c = 0.4 Constant for PM30 (c = 0.3 for PM10)

p = 125 number of days with at least 0.01 in of precipitation per year

S = 10 mph speed limit

$$PM = \frac{4.03 \text{ lb/mi} \times 11,633 \text{ mi/yr}}{2000 \text{ lb/ton}} = 23.46 \text{ tons/yr}$$

$$PM-10 = \frac{1.05 \text{ lb/mi} \times 11,633 \text{ mi/yr}}{2000 \text{ lb/ton}} = 6.10 \text{ tons/yr}$$

**** unpaved roads ****

IV. Tandem Axle Trucks

$$5.33 \text{ trip/hr} \times 0.083 \text{ mile/trip} \times 2 \text{ (round trip)} \times 8,760 \text{ hr/yr} = 7,751 \text{ mile/yr}$$

$$\begin{aligned} E_f &= k \cdot [(s/12)^a] \cdot [(W/3)^b] / [(M_{dry}/0.2)^c \cdot ((365-p)/365)] \cdot (S/15) \\ &= 4.86 \text{ lb PM/mile} \\ &= 1.26 \text{ lb PM-10/mile} \end{aligned}$$

where k = 10 (particle size multiplier, PM30) (k = 2.6 for PM10)

s = 4.8 mean % silt content of unpaved plant roads

S = 10 mph speed limit

$$\begin{aligned} \text{PM} &= \frac{6.20 \text{ lb/mi} \times 4,653 \text{ mi/yr}}{2000 \text{ lb/ton}} = 14.43 \text{ tons/yr} \\ \text{PM-10} &= \frac{1.61 \text{ lb/mi} \times 4,653 \text{ mi/yr}}{2000 \text{ lb/ton}} = 3.75 \text{ tons/yr} \end{aligned}$$

VII. Semi-Dump Trucks

$$2.86 \text{ trip/hr} \times 0.083 \text{ mile/trip} \times 2 \text{ (round trip)} \times 8,760 \text{ hr/yr} = 4,159 \text{ mile/yr}$$

$$\begin{aligned} E_f &= k \cdot [(s/12)^a] \cdot [(W/3)^b] / [(M_{dry}/0.2)^c \cdot ((365-p)/365)] \cdot (S/15) \\ &= 6.43 \text{ lb PM/mile} \\ &= 1.67 \text{ lb PM-10/mile} \end{aligned}$$

where k = 10 (particle size multiplier, PM30) (k= 2.6 for PM10)

s = 4.8 mean % silt content of unpaved plant roads

a = 0.8 Constant for PM30/PM-10

W = 28 tons, average vehicle weight

b = 0.5 Constant for PM30 (b = 0.4 for PM10)

Mdry = 0.2 surface material moisture content, % (default 0.2 (dry conditions) when using rainfall parameter)

c = 0.4 Constant for PM30 (c = 0.3 for PM10)

p = 125 number of days with at least 0.01 in of precipitation per year

S = 10 mph speed limit

$$\begin{aligned} \text{PM} &= \frac{6.43 \text{ lb/mi} \times 4,159 \text{ mi/yr}}{2000 \text{ lb/ton}} = 13.38 \text{ tons/yr} \\ \text{PM-10} &= \frac{1.67 \text{ lb/mi} \times 4,159 \text{ mi/yr}}{2000 \text{ lb/ton}} = 3.48 \text{ tons/yr} \end{aligned}$$

VIII. Front End Loader

$$46.91 \text{ trip/hr} \times 0.06 \text{ mile/trip} \times 2 \text{ (round trip)} \times 8,760 \text{ hr/yr} = 49,312 \text{ mile/yr}$$

$$E_f = k \cdot [(s/12)^a] \cdot [(W/3)^b] / [(M_{dry}/0.2)^c \cdot [(365-p)/365]] \cdot (S/15)$$

$$= 7.19 \text{ lb PM/mile}$$

$$= 1.87 \text{ lb PM-10/mile}$$

where k = 10 (particle size multiplier, PM30) (k = 2.6 for PM10)

s = 4.8 mean % silt content of unpaved plant roads

a = 0.8 Constant for PM30/PM-10

W = 35 tons, average vehicle weight

b = 0.5 Constant for PM30 (b = 0.4 for PM10)

M_{dry} = 0.2 surface material moisture content, % (default 0.2 (dry conditions) when using rainfall parameter)

c = 0.4 Constant for PM30 (c = 0.3 for PM10)

p = 125 number of days with at least 0.01 in of precipitation per year

S = 10 mph speed limit

$$PM = \frac{7.19 \text{ lb/mi} \times 49,312 \text{ mi/yr}}{2000 \text{ lb/ton}} = 177.37 \text{ tons/yr}$$

$$PM-10 = \frac{1.87 \text{ lb/mi} \times 49,312 \text{ mi/yr}}{2000 \text{ lb/ton}} = 46.12 \text{ tons/yr}$$

$$\text{Total PM Emissions From Unpaved Roads} = 383.03 \text{ tons/yr}$$

$$\text{Total PM-10 Emissions From Unpaved Roads} = 99.59 \text{ tons/yr}$$

**** storage ****

The following calculations determine the amount of emissions created by wind erosion of storage stockpiles, based on 8,760 hours of use and USEPA's AP-42 (Pre 1983 Edition), Section 11.2.3.

Material	Silt Content (wt %)	Pile Size (acres)	Storage Capacity (tons)	P M Emissions tons/yr	P M-10 Emissions tons/yr
Sand	1.1	0.75	15,600	0.17	0.06
Gravel	0.9	0.62	33,500	0.12	0.04
Limestone	1.2	1.62	33,500	0.41	0.14
RAP	0.8	3.59	20,000	0.61	0.21
Slag	0.9	0.86	18,000	0.16	0.06
Total				1.47	0.52

Sample Calculation:

$$E_f = 1.7 \cdot (s/1.5) \cdot (365-p)/235 \cdot (f/15)$$

$$= 1.27 \text{ lb/acre/day}$$

where s = 1.1 % silt

p = 125 days of rain greater than or equal to 0.01 inches

f = 15 % of wind greater than or equal to 12 mph

$$E_p (\text{storage}) = \frac{E_f \cdot (365 \text{ day/yr}) \cdot (\text{pile size in acres})}{(2,000 \text{ lb/ton})}$$

$$PM = 0.17 \text{ tons/yr} \quad PM-10: 35\% \text{ of PM} = 0.06 \text{ tons/yr}$$

****cold mix VOC storage emissions ****

The following calculations determine the amount of VOC emissions created by the application of stockpile mix with 10.0% diesel-like solvent in cutback asphalt, based on 8,760 hours of use and USEPA's AP-42, 5th Edition, Section 4.5, Table 4-5-1.

VOC Emission Factor = 0.21 weight percent flash-off of cold mix

Potential Throughput (tons/yr) = 3,504,000 tons/yr stockpile mix

Potential VOC Emissions (tons/yr) = Potential Throughput (tons/yr) * wt percent flash-off

Potential VOC Emissions = 7,358.40 tons/yr

Weight percent flash-off is based on a stockpile mix consisting of 7% cutback asphalt and 93% aggregate and was obtained from USEPA AP-42, 5th Edition, Section 4.5, Table 4.5-1.

**** summary of source emissions before controls ****

Criteria Pollutants:

P M:	56,688.81 ton/yr	
P M-10:	8,175.59 ton/yr	
S O 2:	552.96 ton/yr	
N O x:	175.01 ton/yr	
V O C:	7,372.23 ton/yr	(VOCs include HAPs from aggregate drying operation)
C O:	44.33 ton/yr	

**** source emissions after controls ****

In order to qualify for the FESOP program, this source must limit PM-10, SO₂, and NO_x emissions to less than 100 tons per year, and VOC emissions to less than 25 tons per year. Consequently, SO₂ emissions from the aggregate dryer must be limited to 88.72 tons per year (99.0 ton/yr - 10.28 ton/yr from the miscellaneous combustion sources). The NO_x emissions from the aggregate dryer must be limited to 97.50 ton/yr (99.0 ton/yr - 1.50 ton/yr from the miscellaneous combustion sources).

* Emissions of PM and PM-10 from aggregate drying operations are controlled with a 99.877 % control efficiency.

The following calculations determine the amount of emissions created by waste oil @ 1.0 % sulfur based on a fuel usage limitation of 1,207,080 gal/yr:

Re-refined Waste Oil: $\frac{1,207,080 \text{ gal/yr}}{2000 \text{ lb/ton}}$ * Ef (lb/1000 gal) = (ton/yr)

$$= \frac{0.1679 \text{ MMCF n.g. burned}}{\text{Kgal \#4 F.O. burned}}$$

****cold mix VOC storage limitations ****

The following calculations determine the amount of VOC emissions created by the application of liquid binder for cold mix stockpiles, based on the source's use of cutback asphalt with solvent as the liquid binder type. Emulsified asphalt with solvent is defined with the following properties:

Maximum Weight % of VOC solvent in binder	10.0 %
Weight % of VOC solvent in binder that evaporates:	21.0 %
Volume of diluent allowed	7 % (per 326 IAC 8-5-2)

In order to qualify for the FESOP program, this source must limit VOC emissions to less than 25 tons per year. Deducting the VOC emitted from other activities, VOC solvent usage as diluent in the liquid binder used in the production of cold mix asphalt from the plant shall be limited to 12.08 tons of VOC emitted per twelve (12) consecutive month period. This is equivalent to limiting the usage of cutback asphalt with solvent liquid binder to less than 57.52 tons of VOC solvent per 365 day period, based on 21.0 percent (%) by weight of the VOC solvent in the liquid blend evaporating.

**** source emissions after controls ****

aggregate drying:		nonfugitive	
P M:	56,064.00 ton/yr x	0.1% emitted after controls =	68.85 ton/yr
P M-10:	7,884.00 ton/yr x	0.1% emitted after controls =	9.68 ton/yr

The source is limiting hot mix production to 1,000,000 tons per year.

		nonfugitive	
P M:	68.85 ton/yr x	$\frac{1,000,000 \text{ Limited Throughput (tons/yr)}}{3,504,000 \text{ Potential Throughput (tons/yr)}}$	19.65 ton/yr

		nonfugitive	
P M-10:	9.68 ton/yr x	$\frac{1,000,000 \text{ Limited Throughput (tons/yr)}}{3,504,000 \text{ Potential Throughput (tons/yr)}}$	2.76 ton/yr

conveying & handling:		fugitive	
P M:	19.24 ton/yr x	50% emitted after controls =	9.62 ton/yr
P M-10:	9.16 ton/yr x	50% emitted after controls =	4.58 ton/yr

unpaved roads:		fugitive	
P M:	383.03 ton/yr x	50% emitted after controls =	191.51 ton/yr
P M-10:	99.59 ton/yr x	50% emitted after controls =	49.79 ton/yr

storage piles:		fugitive	
P M:	1.47 ton/yr x	50% emitted after controls =	0.74 ton/yr
P M-10:	0.52 ton/yr x	50% emitted after controls =	0.26 ton/yr

cold mix VOC storage:		fugitive	
VOC:	12.08 ton/yr x	100% emitted after controls =	12.08 ton/yr

**** summary of source emissions after controls ****

Criteria Pollutant:	Non-Fugitive	Fugitive	Total
P M:	26.47 ton/yr	201.87 ton/yr	228.34 ton/yr
P M-10:	8.76 ton/yr	54.63 ton/yr	63.39 ton/yr
S O 2:	99.00 ton/yr	0.00 ton/yr	99.00 ton/yr
N O x:	99.00 ton/yr	0.00 ton/yr	99.00 ton/yr
V O C:	12.92 ton/yr	12.08 ton/yr	25.00 ton/yr
C O:	30.17 ton/yr	0.00 ton/yr	30.17 ton/yr

**** miscellaneous ****

326 IAC 7 Compliance Calculations:

The following calculations determine the maximum sulfur content of distillate fuel oil (# 2 and #4 oil) allowable by 326 IAC 7:

$$\begin{array}{rcl} 0.5 \text{ lb/MMBtu} \times 140,000 \text{ Btu/gal} & = & 70 \text{ lb/1000gal} \\ 70 \text{ lb/1000gal} / 142 \text{ lb/1000 gal} & = & 0.5 \% \end{array}$$

Sulfur content must be less than or equal to 0.5% to comply with 326 IAC 7.

The following calculations determine the maximum sulfur content of waste (residual) oil allowable by 326 IAC 7:

$$\begin{array}{rcl} 1.6 \text{ lb/MMBtu} \times 140,000 \text{ Btu/gal} & = & 224 \text{ lb/1000gal} \\ 224 \text{ lb/1000gal} / 147 \text{ lb/1000 gal} & = & 1.5 \% \end{array}$$

Sulfur content must be less than or equal to 1.5% to comply with 326 IAC 7.

326 IAC 6-3-2 Compliance Calculations:

The following calculations determine compliance with 326 IAC 6-3-2 for process weight rates in excess of 30 tons per hour:

$$\text{limit} = 55 * (400^{0.11}) - 40 = 66.31 \text{ lb/hr or } 290.45 \text{ ton/yr}$$

Source-wide emissions of PM must be less than 250 tons per year such that the requirements of 326 IAC 2-2 (PSD) are not applicable. Therefore, PM from the aggregate dryer shall be limited as follows:

$$250 \text{ tons PM/yr} - 205.91 \text{ tons PM from other sources} = 44.09 \text{ ton/yr} = < 10.07 \text{ lbs/hr}$$

PM-10 Emission Limit:

$$\begin{array}{rcl} (99.0 \text{ tons PM}_{10}/\text{yr} - 57.84 \text{ tons PM}_{10}/\text{yr from other sources}) & & \\ = 41.2 \text{ tons PM}_{10}/\text{yr} & = & 9.40 \text{ lb/hr, based on 8,760 hr/yr} \\ & & 0.08 \text{ lb PM}_{10}/\text{ton asphalt, based on 1,000,000 tons asphalt /yr} \end{array}$$

PM-10 emissions from the aggregate dryer are controlled to 2.8 tons/yr < 41.2 tons/yr (Will comply)

**** miscellaneous ****

40 CFR Part 60.90, Subpart I (Standards of Performance for Hot Mix Asphalt Plants) Compliance Calculations:

The following calculations determine compliance with NSPS, which limits stack emissions from asphalt plants to 0.04 gr/dscf:

$$\frac{19.65 \text{ ton/yr} * 2000 \text{ lb/ton} * 7000 \text{ gr/lb}}{525,600 \text{ min/yr} * 45,853 \text{ dscf/min}} = 0.01 \text{ gr/dscf} \quad (\text{will comply})$$

Allowable particulate emissions under NSPS equate to 68.858 tons per year. 15.72 lbs/hr

Note:

$$\begin{aligned} \text{SCFM} &= 65,132 \text{ acfm} * (460 + 68) / (460 + 290) \\ &= 45,853 \text{ scfm} \end{aligned}$$

Hazardous Air Pollutants (HAPs)

**** aggregate dryer burner****

The following calculations determine the amount of HAP emissions created by the combustion of distillate fuel oil before & after controls @ 0.5 % sulfur, from the aggregate dryer burner and the tank heater, based on 8760 hours of use and US EPA's AP-42, 5th Edition, Section 1.3 - Fuel Oil Combustion, Table 1.3-11.

Hazardous Air Pollutants (HAPs):		118.5 MMBtu/hr * 8760 hr/yr	* Ef (lb/10 ¹² Btu) = (ton/yr)	
		2,000 lb/ton		
			<u>Potential To Emit</u>	<u>Limited Emissions</u>
Arsenic	4.2 lb/10 ¹² Btu =		2.18E-03 ton/yr	2.68E-06 ton/yr
Beryllium:	2.5 lb/10 ¹² Btu =		1.30E-03 ton/yr	1.59E-06 ton/yr
Cadmium:	11 lb/10 ¹² Btu =		5.71E-03 ton/yr	7.01E-06 ton/yr
Chromium:	67 lb/10 ¹² Btu =		3.48E-02 ton/yr	4.27E-05 ton/yr
Lead:	8.9 lb/10 ¹² Btu =		4.62E-03 ton/yr	5.67E-06 ton/yr
Manganese:	14 lb/10 ¹² Btu =		7.27E-03 ton/yr	8.92E-06 ton/yr
Mercury:	3 lb/10 ¹² Btu =		1.56E-03 ton/yr	1.91E-06 ton/yr
Nickel:	170 lb/10 ¹² Btu =		8.82E-02 ton/yr	1.08E-04 ton/yr
Total HAPs =			1.46E-01 ton/yr	1.79E-04 ton/yr

The following calculations determine the amount of emissions created by re-refined waste oil combustion, from asphalt heating, @ 0.0 % lead, based on 8760 hours of use and US EPA's AP-42, 5th Edition, Section 1.11 - Waste Oil Combustion, Tables 1.11-1, 1.11-2, and 1.11-3.

Hazardous Air Pollutants (HAPs):		120 MMBtu/hr * 8760 hr/yr	* Ef (lb/1000 gal) = (ton/yr)	
		120,000 Btu/gal * 2000 lb/ton * 1000 gal/kgal		
			<u>Potential To Emit</u>	<u>Limited Emissions</u>
Lead:	0.825 lb/1000 gal =		3.61 ton/yr	4.44E-03 ton/yr

**** aggregate drying: batch-mix plant ****

The following calculations determine the amount of HAP emissions created by aggregate drying before & after controls, based on 8,760 hours of use and USEPA's AP-42, 5th Edition, Section 11.1 - Hot Mix Asphalt Plants, Table 11.1-9 for a batch mix dryer which can be fired with either fuel oil or natural gas. The HAP emission factors are for an oil fired dryer which was the worst case fuel for VOC emissions.

Pollutant:	Ef	lb/ton x	400	ton/hr x	8760 hr/yr
			2000	lb/ton	

Hazardous Air Pollutants (HAPs):

			Potential To Emit	Limited Emissions
Acetaldehyde:	3.2E-04	lb/ton =	0.56 ton/yr	0.56 ton/yr
Benzene:	1.7E-04	lb/ton =	0.30 ton/yr	0.30 ton/yr
Ethylbenzene:	1.6E-03	lb/ton =	2.80 ton/yr	2.80 ton/yr
Formaldehyde:	4.3E-04	lb/ton =	0.75 ton/yr	0.75 ton/yr
PAH (total) HAPs:*	1.1E-04	lb/ton =	0.19 ton/yr	0.19 ton/yr
Quinone:	1.4E-04	lb/ton =	0.25 ton/yr	0.25 ton/yr
Toluene:	8.8E-04	lb/ton =	1.54 ton/yr	1.54 ton/yr
Xylene:	2.1E-03	lb/ton =	3.68 ton/yr	3.68 ton/yr
Total HAPs =			10.07 ton/yr	10.07 ton/yr

* See AP-42, Section 11.1, Table 11.1-9 for complete listing of PAH HAPs.

**** summary of source HAP emissions potential to emit ****

Hazardous Air Pollutants (HAPs):

Acetaldehyde:	0.56 ton/yr
